What is INFERNO ?

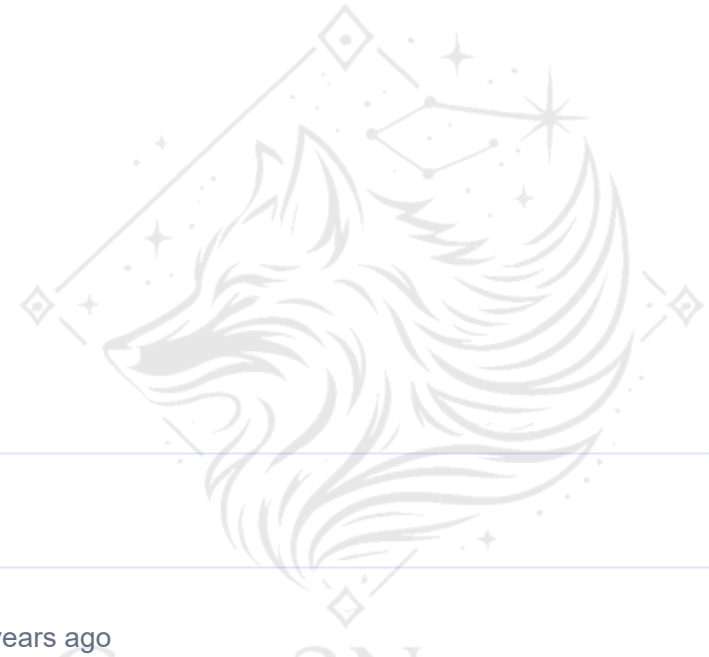

Protocol Overview

Inferno is simple: Use $TITANX and mint $INFERNO. There are 8, twenty four hour mint cycles and 90% buy and burn.

- Step into the arena, folks! Meet Inferno, the coolest bull in the blockchain rodeo. We're talking eight 24-hour sessions of token minting, smooth as a bull’s strut. Did we say he is 'BULLISH ON BLAZE' ?
- Got your liquid TitanX ready? That’s your ticket to ride this beast.
- Inferno starts the show every Friday at 2pm UTC and chills out until Saturday at 2pm UTC.
- After each 24-hour ride, claim your tokens and bask in the glory.
- Eight consecutive Saturdays, eight weeks of epicness.
- As soon as 50 billion TitanX swaggers in on day one, the LP pool gets grooving.
