Welcome to Jager Hunter!

$JAGER is a MEME token built on the BNB Chain. It has no association with the smallest unit of BNB.

In an era where endless PVP battles and paper-handed panic in the *pump.fun* model have exhausted the community,

$JAGER embraces only two simple rules: ON-CHAIN — Deploy every contracts on-chain and renounce all contract ownerships, and Simple, Transparent, and Fair Airdrop Standards.

Everything else left to the community.

Let’s bring Memecoins back to where it all began.

CRYP2NOVA

The Origin of Jager

During Binance’s early days, there was a highly active community manager known by the username "Jager." Jager was one of the most engaged volunteers across Binance’s Telegram groups and other social platforms, widely recognized for his consistent participation and unwavering support for the community. To honor the core Web3 value of “Community-driven BUDL” and “Consensus”, Binance named the smallest unit of BNB as "Jager." It became a cultural symbol emphasizing the importance of early contributors.

The sole vision of the Jager Hunter Memecoin is to carry forward this community spirit using the power that blockchain bestows upon everyone.
