How It Works

- Official $JAVLIS contract address: 0x440D06b2aC83Ff743d9e149Be582A4b2b2c6adEc ↗
- $JAVLIS token: here

Experience xTrade under https://app.leverageX.trade/ ↗

✖ What is xTrade?

xTrade is the trade excecution engine that transforms AI-powered signals from JAVLIS into real leveraged trades. It's directly integrated into the LeverageX app.

Every xTrade setup is fully curated by JAVLIS, based on real-time inefficiencies and strategy logic. No searching. No guessing. Just act on the signal.

🔍 Where to Find xTrade and How It Works

xTrade is an additional functionality **within the LeverageX app** (app.leveragex.trade/↗). xTrade is located in the top-left area of the trading interface, between the “**Long**” and “**Short**” buttons.

CRYP2NOVA

ℹ️ How It Works

1. **Go to app.leveragex.trade/↗**
2. **Connect your wallet**
3. **Click on the xTrade icon**
4. **JAVLIS will suggest the asset, direction (Long/Short), and leverage** based on your level and unlocked modules.

   Click the "*Refresh*" icon to get a new suggestion.
5. **Review the setup**
6. **Click on xTrade** to execute, confirm the trade in your wallet (e.g. Metamask) and you're done
7. Watch your trade in your open positions at the bottom of the LeverageX page.

See all trading signals and select a trade

Click the “*Signals*” icon to view all signals generated by JAVLIS. Select any token to initiate a trade based on its current setup.

Customize xTrade

Click the "*Settings*" icon to cutomize:

- Collateral assets to be used
- Collateral Range in $
- Leverage Range

Click “*Save Changes*” and reopen the xTrade window to receive updated suggestions.
