Recap Bull/Bear Deep Dive Create Your Own Report Last Updated: Feb-4-2026 21:39 UTC Currently Interesting Jupiter has secured a $35 million strategic investment from ParaFi Capital, with the transaction settled entirely in JupUSD at its spot price and an extended lockup period 1 2 3 . This investment is intended to accelerate Jupiter's on-chain financial infrastructure development 3 . The deal will nearly double the circulating supply of JupUSD, which had a market cap of approximately $38.7 million 3 . This move highlights growing institutional confidence in Jupiter's ecosystem and its native stablecoin, JupUSD, which was launched in January 2026 and is primarily backed by USDtb, collateralized by BlackRock’s BUIDL tokenized treasury fund 3 . Jupiter also integrated Polymarket, bringing on-chain prediction markets to Solana for the first time directly within the Jupiter app 1 4 2 5 . This integration allows users to trade Polymarket contracts without leaving Jupiter, positioning the platform as a comprehensive on-chain predictions hub 2 5 . Jupiter's co-founder, Meow, indicated that "Jupiter predict" will be a major focus for the upcoming year 2 . This expansion into prediction markets is a significant step for Jupiter, aiming to leverage Polymarket's status as the largest crypto predictions market to become the leading platform on Solana 2 . Furthermore, Jupiter introduced Jupiter Global, a new suite of payment services designed to bring real-world payments on-chain 1 6 . This suite includes QR scan-to-pay with 0% fees, virtual fiat accounts for USD, EUR, and GBP, and global transfers via SWIFT 1 6 . Jupiter Global also features the Jupiter Card, a virtual Visa card with 1:1 USDC-to-USD settlement, which will launch in select jurisdictions 6 . These initiatives, along with the introduction of Jupiter ID for secure onboarding, aim to expand Jupiter's utility beyond DeFi into everyday financial transactions 6 . Get Caught Up Jupiter launched its native stablecoin, JupUSD, in partnership with Ethena Labs on January 5, 2026 7 8 . JupUSD is designed to be a core component of Jupiter's "superapp" and will be integrated across its product suite, including Jupiter Lend 7 . Initially, JupUSD is backed 90% by Ethena's USDtb, which is collateralized by BlackRock’s tokenized USD Institutional Digital Liquidity Fund (BUIDL) 7 . This launch aims to unify dollar liquidity within the Jupiter ecosystem, with approximately $500 million in USDC collateral from the Jupiter Perps LP (JLP) pool undergoing a phased transition to JupUSD 7 . On January 22, 2026, Jupiter and Ondo Finance announced a partnership to bring over 200 tokenized U.S. stocks and ETFs to the Solana blockchain via the Ondo Global Markets platform 9 . Jupiter will serve as the primary gateway for users to trade these tokenized assets, significantly expanding Solana's offerings in this area 9 . This collaboration capitalizes on the growing demand for on-chain equities and aims to address previous limitations in asset selection and liquidity depth on Solana 9 . KuCoin Futures announced on January 24, 2026, that it would launch new perpetual contracts for JUPUSDT, allowing users to trade Jupiter's native token with leverage 10 . This development increases the accessibility and trading options for JUP, potentially enhancing its liquidity and market presence on a major centralized exchange 10 . Biggest Stories of 2025 Beldex (BDX) Listing on Jupiter DEX Aggregator Beldex (BDX) officially launched on the Jupiter DEX Aggregator, allowing users to trade the Solana-based BDX token directly through Jupiter Ultra V3. This move enhances BDX's accessibility and liquidity within the Solana ecosystem. (December 28, 2025) 11 Coinbase Enables Solana DEX Trading via Jupiter Coinbase announced new features, including the ability for its users to trade any Solana DEX token directly via debit cards, bank accounts, or USDC, with Jupiter facilitating these direct token swaps. This significantly expands access to Solana's DeFi ecosystem for Coinbase users. (December 19,

2025) 12 Jupiter Lend Exits Beta and Open-Sourced Jupiter Lend officially exited its beta phase and was open-sourced, making its codebase and audits publicly available. This move enhances transparency and allows for broader community contributions. (December 12, 2025) 13 Jupiter VRFD Launch Jupiter launched Jupiter VRFD, a verification layer designed to authenticate tokens and combat scams. This builds on Jupiter's existing strictlist and provides a trusted data layer for verified token information. (December 12, 2025) 14 15 Dispute Between Jup Lend and Kamino Escalates A public dispute between Kamino and Jupiter escalated after Jup Lend launched a single-click refinancing tool to migrate positions from Kamino Multiply. Kamino subsequently updated its smart contracts to block Jupiter's refinancing program, citing concerns over Jupiter's claims about collateral isolation. (December 9, 2025) 16 Jupiter Executive Acknowledges "Zero Contagion" Claim Was Not "100% Correct" Jupiter executive Kash Dhanda admitted that previous claims of "zero risk of contagion" for Jupiter Lend vaults were "not a hundred percent correct" following community backlash regarding the use of rehypothecated assets. (December 6, 2025) 17 Jupuary 2026 Stakers Allocation Increased In response to community feedback, the Jupuary 2026 Stakers Allocation was increased to 60 million JUP, with 30 million JUP distributed upfront and 30 million JUP allocated to a bonus pool. This matches the percentage allocated to stakers in Jupuary 2025. (December 5, 2025) 18 Jupiter DTF Launchpad Reintroduction Jupiter announced the reintroduction of token raises through Jupiter DTF, an on-chain framework for transparent project funding. This system features full on-chain transparency for token supply and allocations held in escrow through Jup Lock. (November 25, 2025) 19 Jupuary 2026 Initial Airdrop Plans Revealed Kash Dhanda revealed tentative plans for the Jupuary 2026 airdrop, including an initial distribution of 200 million JUP (175 million for users and 25 million for stakers), a 200 million JUP bonus pool, and 300 million JUP for Jupnet incentives. (November 20, 2025) 18 Jupiter Co-Founder Discusses Stablecoins as a Great Business Jupiter's co-founder discussed the evolution of Jupiter into a comprehensive DeFi super app and the upcoming launch of JupUSD, a stablecoin in partnership with Athena Labs, aimed at unifying liquidity and generating yield. (October 23, 2025) 20 Proposal for $JUST: Jupiter Universal Stable Token Jupiter proposed the creation of JUST (Jupiter Universal Stable Token), a DAO-governed stablecoin designed to strengthen the Jupiter ecosystem on Solana by providing stability, generating yield, and expanding governance utility. (October 10, 2025) 21 22 Jupiter Under Fire for Token Performance Despite ongoing buybacks, the JUP token hit an all-time low against SOL, leading to frustration among holders who called for increased utility and transparency. (October 7, 2025) 23 Jupiter Lend Public Beta Launch The Jupiter Lend Public Beta went live, including Multiply (leverage looping) functionality and incentivized with over $2 million in rewards. It launched with over 40 vaults, supporting borrowing against JUP and JLP. (August 27, 2025) 13 Jupiter Lend Readies for Public Beta Launch Jupiter announced that its first lending product, Jupiter Lend, would launch in public beta on Solana, built on Fluid’s advanced liquidity and risk engine to enable high LTV ratios. (August 21, 2025) 24 Jupiter Perp Lending Parameter Update Jupiter updated its USDC lending parameters following the launch of USDC borrowing to increase utilization within the JLP pool, aiming to optimize borrowing capacity while minimizing liquidity risk. (August 14, 2025) 25 Jupiter Lend Private Beta Launch The Jupiter Lend Private Beta went live with six vaults, each subject to a $1 million borrowing limit. Advanced features were planned for post-public launch. (August 5, 2025) 13 Jupnet Private Testnet Scheduled

The Jupiter team announced that the Jupnet private testnet was scheduled to launch in Q3, with the public testnet following in Q4 2025. Jupnet aims to be an omnichain network integrating with various blockchains. (July 11, 2025) 26 Jupiter Lend Public Launch Rescheduled The public launch of Jupiter Lend was rescheduled for mid-August 2025, with the private beta expected to go live by early August. (July 10, 2025) 13 Jupiter Unveils New Lending Protocol Jupiter announced the launch of Jupiter Lend, a new Solana-based lending protocol developed with Fluid, at the Solana Accelerate conference. It aims to offer high loan-to-value ratios and advanced money market services. (May 22, 2025) 27 28 Jupiter Distributes Over $600 Million in 'Jupuary' Airdrop Jupiter conducted its "Jupuary" airdrop, distributing 700 million JUP tokens valued at $616 million to its community. The airdrop targeted users who engaged in token swaps and key community contributors. (January 22, 2025) 29 30 JupNet Omnichain Network Announced Meow, the founder of Jupiter Exchange, announced the launch of JupNet, an omnichain network designed to aggregate all crypto into a single decentralized ledger. JupNet aims to connect all chains into a usable system to facilitate liquidity for all tokens.
