Kishu Inu Whitepaper Archive

CRYP2NOVA

Archived copy · cryp2nova.com

\n

Last reviewed: 2026-05-07

\n

This folder preserves the original Kishu Inu whitepaper as a historical record.

\n

Files

\n

\n

- `original-kishu-inu-whitepaper.pdf` - unchanged archived copy of the original whitepaper. The PDF metadata reports a creation date of 2021-08-17 and the document points to the older `www.kishu.com` domain.
  \n
- `README.md` - this current archive note. It is not a replacement whitepaper.
  \n

\n

Why The Original PDF Is Not Edited

\n

The original PDF is being kept unchanged so the community can inspect what was actually published at the time. Corrections, typo fixes, and current project updates should be made in a separate revised document later instead of overwriting the archive copy.

\n

Current Token Reference

\n

\n

- Token tracker: Kishu Inu (`KISHU`) on Etherscan
  \n
- Network: Ethereum Mainnet
  \n
- Contract: `0xa2b4c0af19cc16a6cfacce81f192b024d625817d`
  \n

Archived copy · cryp2nova.com

- Decimals: 9
  \n
- Max total supply: `100,000,000,000,000,000 KISHU`
  \n
- Current homepage: kishu.finance
  \n

\n

Live holder counts, transfers, market data, verified source details, and token tracker updates should be checked on Etherscan because those values can change.

\n

Known Archive Issues

\n

The original whitepaper is a historical artifact and includes issues that should be addressed in a future revised whitepaper:

\n

- \n
- Old domain and social references, including `www.kishu.com`.
  \n
- Typos or wording problems such as \"not an licensed\", \"can not\", \"communication is encourage\", \"distrubuted\", \"KISHUrewards\", and \"a ownerless\".
  \n
- Roadmap/product items that should be treated as historical unless a current repo, deployment, and public maintenance record verifies them.
  \n
- Ecosystem claims that need current evidence before being repeated as active functionality.
  \n

\n

Historical Ecosystem Items

\n

The original whitepaper referenced these ecosystem projects:

\n

- \n
- KISHU Swap
  \n
- KISHU Crate
  \n
- KISHU Paw Print
  \n
- KISHU sWAG
  \n

\n

Archived copy · cryp2nova.com

These should be documented as historical, abandoned, or under-review items unless each project has current public code, current deployment details, current maintainer accountability, and accurate user-facing documentation.

\n

For KISHU Crate specifically, recovered public notes should not repeat old claims about staking and NFT rewards unless the deployed contracts and interface behavior prove that those rewards were actually available. Historical wording should be labeled as historical wording.

\n

Future Revised Whitepaper

\n

A future revised whitepaper should be a new file, not a replacement for the archive PDF. It should:

\n

\n
- Preserve the original history separately.
  \n
- Fix typos and unclear language.
  \n
- Remove or clearly label abandoned roadmap promises.
  \n
- Cite current contracts, repositories, deployments, and ownership/control facts.
  \n
- Avoid claims about earning, staking, NFTs, or utility unless the current implementation proves them.
  \n
