Introducing Kodiak

Leading Decentralized Trading & Liquidity Platform

Kodiak, is the first vertically-integrated liquidity platform combining the following layers:

- Decentralized Exchange (Kodiak DEX): providing users with a non-custodial, highly capital-efficient trading and liquidity provision experience powered by its concentrated and full-range AMMs.
- Automated Liquidity Manager (Kodiak Islands): attracting sticky deposits from the average user through our set-and-forget automated concentrated liquidity strategy vaults.
- Integrated Incentive Layer (Sweetened Islands): tapping into Berachain's Proof-of-Liquidity (PoL) mechanism to sustainably incentivize liquidity for Kodiak Islands.
- No-Code Token Deployer Factory (Panda Factory): facilitating the permissionless deployment of new tokens and their initial (e.g., memecoins) liquidity on the Kodiak full-range AMM (on Berachain) or Uniswap V2 (on Robinhood Chain). This is ideal for highly volatile assets whose price characteristics are undiscovered.

- BGT Auto-Compounding Vaults (Baults): ERC-4626 compatible smart yield-maximizing, yield-bearing vaults that help users automatically grow their Kodiak Island Tokens.
- Super Aggregator (kX): advanced swap aggregator and API, automatically finding the best route to swap, whether or not it's in a Kodiak Liquidity Pool.
- Decentralized Perpetual Exchange (Kodiak Perps): enabling users to trade the most popular tokens with up to 100x leverage with PoL-powered incentives.
