👋Welcome to LeverUp

Copy

What is LeverUp?

LeverUp is an LP-Free perpetuals exchange delivering uncapped open interest, 100% fee redistribution to traders, and leverage up to 1001x

What Makes Us Different

- **LP-Free Architecture**: A paradigm shift: open interest is not shackled by TVL, liquidity depth, or passive providers. Traders engage directly with the protocol at full scale
- **100% Protocol Fee Recirculate back to Traders**: 100% of protocol fees are captured and returned to traders, compounding network value where it belongs
- **Native LVUSD Settlement**: Integrated stablecoin layer delivering stability, composability, and capital efficiency across the ecosystem
- **Uncapped Market Depth**: A design that breaks liquidity ceilings, enabling unprecedented capital efficiency and truly flexible open interest
- **Extreme Leverage, Universal Assets**: 1001x exposure across crypto majors and real-world assets, powered by an institution-grade risk engine
- **Transparency**: Every position, point, metric, and protocol flow is on-chain and verifiable — nothing hidden, nothing off-chain
