Date: September 2024

CRYP2NOVA

Abstract

Liora is a decentralized, blockchain-based platform designed to empower creators by allowing them to take full control over their content, data, and monetization. It seeks to disrupt traditional social media and content platforms by introducing a token-based economy where creators and users can directly interact without intermediaries. Liora leverages decentralized governance, NFTs, and creator tokens to build a fair, open, and user-controlled ecosystem where creators can thrive financially and artistically.
