Introduction

LiveArt

LiveArt is the first AI-powered RWAfi protocol where you can buy, trade, borrow & swap fractions of Picassos, Rolexes, and investment-grade assets.

LiveArt is the first **AI-powered RWAfi protocol** bringing a **$10 trillion RWA market of investment-grade** assets onchain.

Cultural assets worth $10 trillion have been sitting dead for centuries. Locked in private vaults, traded only at exclusive auctions, accessible only to the ultra-wealthy.

This isn't an abstract market — it's Warhols, **Picassos, rare Rolexes, vintage cars**. Real assets with real demand, just impossible to access or trade.

The infrastructure already works. The demand is proven. Now it's accessible to everyone.

LiveArt changes that. We're the first AI-powered RWAfi protocol turning this dead capital into living, tradable assets onchain. No more waiting months for auction houses. No more needing $1 million minimums. Just fractional ownership, instant liquidity, and full crypto utility for assets that have been appreciating for decades.

Here's how we unlock that $10 trillion market for you:

AI-Powered Tokenization & Fractionalization
