About Major

2024

MAJOR

Major is the first ranking game on Telegram, which has attracted over 50 million users and connected more than 20 million TON wallets in a little more than three months.

Participants in the game compete to achieve a high game rating by completing daily tasks and inviting friends.

The game supports TON Connect and rewards top-rated players with Toncoin.

Major is a Play to Earn project on Telegram with a unique idea and implementation, created to enhance the popularity of the platform and the TON blockchain.

In the first phase, we used the best mechanics and references to attract an audience and increase media weight.

The game is not tied to any region and is seamlessly integrated into Telegram, which determined the high development potential and great interest from users.

Major does not violate Telegram's rules, but rather solves a problem and from day one popularizes the new payment method on the platform. Many users are initially wary of Stars, and Major, with such growth rates, is doing a great job and helps form the habit of using Stars.
