Welcome to MerlinSwap

Copy

MerlinSwap represents a groundbreaking advancement in decentralized exchange (DEX) platforms, constructed atop the Merlin Chain, a native Layer2 protocol of Bitcoin. This platform is engineered to deliver an experience akin to centralized exchanges (CEX) within the decentralized finance (DeFi) ecosystem. By leveraging the robustness of the Bitcoin ecosystem and the interoperability of the Merlin EVM, MerlinSwap sets new standards in trading efficiency, liquidity management, and user engagement in the DeFi sector.
