# The Official MGC Whitepaper

The reward token powering the RZ Ecosystem.

MetaGamesCoin (MGC) is the reward token that fuels the RZ Ecosystem — a decentralized network of platforms uniting gaming, finance, and community under one digital economy.

Originally created to connect gamers through competition and fair rewards, MGC has evolved into the incentive currency that drives millions of user interactions across the RZ universe.

Unlike speculative assets that rise and fall with market trends, MGC is built on real participation. It powers engagement, creativity, and collaboration across Ranking.Game, CoinMining.Game, CoinRanking.Game, RZ Prime, CoinBank, and RZOasis — ensuring that time, effort, and contribution are rewarded with measurable value.

The whitepaper covers the full picture: token design, the ecosystem's platforms, how rewards flow between them, and the long-term vision.

**WHAT'S INSIDE**

- The vision behind MGC and the RZ Ecosystem
- Token design — BEP-20 on BNB Chain, utility, and reward mechanics
- Tokenomics — supply, distribution, and circulation model
- The ecosystem in detail — Ranking.Game, CoinMining.Game, CoinRanking.Game, RZ Prime, CoinBank, RZOasis
- How participation translates into measurable value
- Roadmap and long-term direction
