A Unique Blend of Life Simulations and Tycoon Games

Paradise Tycoon is a unique combination of casual life simulation features with gradually unfolding gameplay mechanics of tycoon & building games, a genre that our team at *Empires Not Vampires* has lots of experience with.

Set in a massively multiplayer world and enriched by user-generated content (UGC), Paradise Tycoon creates a blend of **single-player progression, multiplayer social interaction,** and **creativity**.

To ensure the game is accessible to as many players as possible, Paradise Tycoon is cross-platform compatible between **PC and mobile,** and launches on **consoles starting late 2025** (in partnership with Bonus Stage Publishing). Cross-platform compatibility allows players to move seamlessly between short mobile sessions and longer PC gaming experiences, depending on their preferences and situation.
