Introducing Modulr

The Modulr. platform for services, assets, work, storage, AI, ads, and machine coordination across a token-enabled network

Modulr. is a platform for coordinating services, assets, work, content, storage, communication, advertising, AI, and machine activity across a token-enabled network.

Robotics and teleoperation remain the teleoperation core and long-term machine vertical. The platform also supports marketplace jobs, storage, AI services, opt-in advertising, assets, secure communication, and other verified workflows through platform modules.
