INTRODUCTION

Web3Money

Web3 payments are **decentralized finance (DeFi) that use secure ledgers to process money transfers and seek to fight the scrutiny of large financial institutions such as banks**, which often demand fees and data submission in exchange for their services. Cryptocurrencies are blockchain-powered digital forms of value exchange. The difference between digital and physical currency is that the former allows for instantaneous transactions and borderless transfer of ownership.

What else?

On the architectural level, a cryptocurrency is a ledger powering the transactions of its community or organization. The heavy encryption mechanisms that cryptocurrencies use whether it is Skrypt, SHA-256 or CryptoNote, make the ledger immutable which means no single party can possibly alter the records once they are written and confirmed.

In this new network-based economy every active participant (peer) plays the role of their own bank by authorizing the transactions and maintaining the integrity of the open Ledger.

Leading the Future of Financial Technologies

For many, cryptocurrencies became the main topic of conversation in 2017. It was heated with the hype over Initial Coin Offerings (ICO) and Token Generation Events (TGE). Yet, Bitcoin, the world's first cryptocurrency use case has been climbing its way to the top of mass-interest for over 10 years. Invented by an anonymous Satoshi Nakamoto, it started as an open-source community proposal in 2009. And for several years following Bitcoin has been a topic of interest for very niche small Internet communities of developers, cryptographic enthusiasts, and engineers.

Following the Bitcoin's success in 2011-2014, a number of alternative cryptocurrencies were designed to evolve Satoshi's ideas and improve the speed of transactions, anonymity, and usability of the encrypted digital currencies. During this time, Oleg Siryi (more known in the web as Oleg Seriy), the Prophet, Predictor, Businessman, Writer and Media Person, Crypto Enthusiast & Visionary 13 in MONEY GOD ONE launched 1st World decentralized Token of GOD [MGO] which would start a new era in the rEvolution of blockchain connections to the God and CryptoChurch.

We at MGO just creating the Money...

The Realities of Crypto-Economy of MGO, based on SOL

The Solana network has recorded 365 billion transactions through a vibrant ecosystem composed of more than 400 applications in various sectors, mainly decentralized financial services, and crypto art and games. Solana became the #1 ecosystem for new developers in 2024, overtaking Ethereum who occupied this place since 2016, according to Developer Report. Let us understand a bit about Solana and why we should pay attention to it. Early-stage companies during the ICO-mania and memecoins-mania have increased the capitalization of the total cryptocurrency market over the past few years. Transactions based on SOL (like MGO) are fast, secure and cheap. Thanks to the power of Money God One potential our MGO cryptocurrency have deal for the financial sector and is ready to Change This World and be face to face with a new challenges and moving to new horizons. We are the new money and new tradition.

SOLUTION

MGO.money is a individuals-funded decentralized cryptocurrency with a goal and mission to build the strong chain. MoneyGod.ONE Foundation and our subsidiary commercial and non-commercial projects were built with a goal to create borderless World Nation with ONE Language, ONE Vision and ONE Humanity, without wars, crises and fights. MGO was designed for international B2C and B2B transactions and for P2P borderless transfers as well. We guarantee fast transaction speed with low comission fees for people with God in their hearts, for our Church members and other Churches who pray for Money God ONE success, for modern, forward-looking commercial and non-commercial foundations and their clients, customers and Partners with big Hearts. Inspired by Solanas performance, MGO has recognized the need in the market for a reliable, trustworthy payment system that does not depend on the greed of the miners or any other centralized institution. MGO.money was launched on the day of Donald J. Trump's inauguration, 20.01.2025 and since then has already accumulated a number of businesses and communities effortlessly interacting with each other on a daily basis.

The reliable MGO Wallet allows users to send and receive instant transactions (via MGO/SOL/other tokens) that are based on Solana blockchain.

"We are like missionaires with a God token, our Creators told us in the Universe, that we have to Unite Spiritual with Material, God with Money, that is only ONE way to make the Heaven again. All other ways (without Spiritual Growth) lead us to hell. We are building the Golden Age with or without you".

OS, Founder

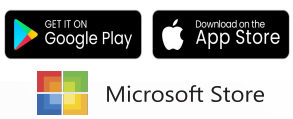

We are creating the Church for our token users, multi-level social projects: spiritual, political, economic. As well as financial commercial projects and programs. Money God One [MGO] is non-federal decentralised crypto token & agency for worldwide service and volunteerism. From mentoring students to supporting disaster recovery, helping older adults age with dignity, and tackling other pressing needs, MGO helps communities across the planet.

Blockchain mass-adoption will come with stability and a user-friendly experience. We see creating the history of the decentralized internet and worldwide power, that cannot be in the same hands. World Power should be decentralized as the blockchain technology. MGO Crypto is a Money and a platform for the future of funding that powering for the new equity blockchain of Money God One (One True God). Our goal is to unite people and make strong beliefs. We have the ONE world cryptocurrency of the Money God. We are the Money of Future for all Humanity!

We are like Americorps built by President Clinton passed the National and Community Service Trust Act of 1993, only we have some differences. Not only US citizens aged 17 and older can participate in our project, but citizens of any country aged 0 and older. We also have no restrictions on creating unions and communities using our MGO token, the purpose of which is to unite people, the whole world, into a single beginning. We are created on a voluntary basis and are a public domain. Our token and project are not federal. But we continue the ideas inspired by the murdered presidents of America, and also continue the ideas of those presidents and public leaders who were killed by political killers around the world. We are for peace throughout the world, for a single humanity, for friendship, for one language, etc. Like Americorps, our activities are diverse, ranging from public education to cleaning the environment. Participation is voluntary, leaving at any time. Unlike Americorps, you choose how much time you will devote to the project and its mission. You can also leave at any time. To join the project as a volunteer, you need to buy a token (our cryptocurrency), to leave the project, you need to sell a token. In memory of true people: Kennedy, Clinton, Gandhi and others. We are not against anyone. We are not for anyone. This is the Internet token of the Church of the Unity of Humanity. Anyone can join "Save Humanity" category to unite people. Just because you are a Human. Know your value, your rights. Hierarchical training system. Financial and spiritual knowledge. You are a human and this is the greatest value. Attention: we currently do not have scholarships, to earn money you need to buy our token cheaper and sell it more expensive. "If you would take, you must first give" (Lao Tzu, Tao Te Ching). We have plans to receive benefits from this for all the members, so all members are interested to let it grow.

To join MGO chain go to MGO.money and claim your free wallet. MGO.money is available for download on Google Play and App Store.

MGO PROJECTED ADOPTION ASAP

MGO.money bridges the gap between the cryptocurrency market and real-world applications ASAP (as soon as possible). Our roadmap includes integration with tourism services, car leasing centers, and online marketplaces. People can send MGO money to other people just in 1 click! Here are just a few examples of how MGO.money brings value to the average online or offline user.

Buy airplane tickets

Lease a car

Shop on an online Marketplace

Make a business transaction

Destination economy

MGO go-to-market strategy aims at the adoption through small and medium size global businesses. Thus, the tourism ecosystem is one of our primary targets and we understand that the tourism agencies and web services are the gatekeepers to the industry offering guided tours, travel services, and partnering with a spectrum of service providers such as hotels, transfers, local guides, restaurants, shows, artists, entertainers, and even car rentals.

Here is a use case when a customer would use MGO.money to shop online for a tour.

- They would visit the website of a tourism agency (within the MGO partner network)
- Enter the trip details and choose the desired tour
- Click on 'pay with MGO' at the checkout
- To prompt a pop-up window with their MGO Wallet and a 'Send MGO' pop-up
- The receiver address would be automatically be copied into the corresponding field

Inside economy transfers

MGO is available as payment system and processor in our commercial and non-commercial projects (Church, Payment Gateways, Stock Exchange, Wallet, Currency Exchangers, Bank, Crowdfunding Company, Publishing House, Merchandaising, Shops, etc.) as well as similar projects of current and future projects.

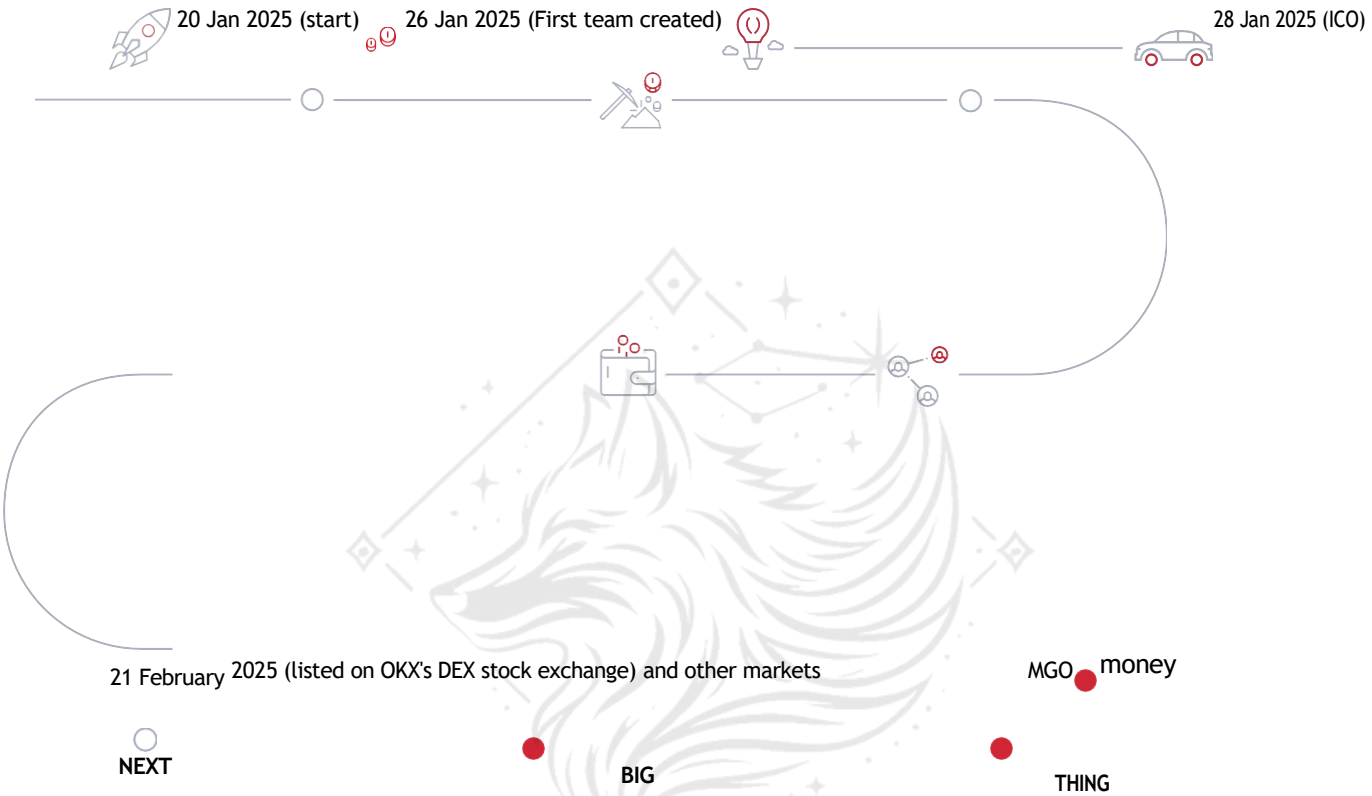

WE ARE BUILDING THE FUTURE

ROADMAP

MGO.money aims to become the standard for cross-border digital transactions and eventually replacing the fiat money like US dollar, etc. with our decentralized network and strong chain. As the network grows, the transaction throughput demands will rise as well. Currently, the MGO network is able to process AMAP (as many as possible) transactions per second. We're planning to be as much cool as possible, to launch many from our own projects, make real our partners and users projects and even to create our own Money God ONE blockchain.

MGO.SUMMARY

The advances in communication technology are driving the economic shift known as globalization. The growth of cross-border transactions accelerates international trade, ideas, and culture. Financial instruments like money, stocks, and bonds are going through rapid changes to support the modernization of the global economy. With a current threshold of 100 transactions per second, MGO.money is one of the fastest, safest and free forms of digital currencies available to connect businesses and customers.
Unlike other blockchains, MGO does not incentivize the race for rewards among its node-holders focusing instead on building a fair, eco-friendly, and trustworthy community. For the same reason, the management has decided to bootstrap the project with friends and family funding and resources instead of launching an unnecessary coin offering.

MGO is not about technology, but about the token (God Money) of the ONE Money God, which allows for fast network growth and Unite Spiritual and Material Growth in One Place – on the Earth. MGO also connecting Humans with Nature, Aliens and all other possible and impossible creatures, created by God and Light! Everyone should understand that there is no darkness around. Darkness is simply the absence of light. The MGO powerful network is a solution designed to scale from both philosophical and technological points of view. We combining theosophy, metaphysics, crypto-faith and decentralized blockchain technologies. Our solutions are rapidly Changing This World and our Network would allow MGO to become virtually the best form of digital payment worldwide.
