1. Overview

Copy

Moongate is a decentralized platform built on the Binance Smart Chain (BSC) that empowers users to launch tokens and integrate AI agents—such as 𝕏 bots, Telegram bots, and Discord bots—using the Moongate Framework. Designed for ease of use, Moongate enables both developers and non-technical users to deploy tokens and AI-powered agents with just a few clicks.

With a focus on simplicity, efficiency, and scalability, Moongate aims to streamline the token and AI agent deployment process on BSC, making it accessible to anyone interested in building or growing their blockchain project.
