Abstract

Muntze is an AI-powered cryptocurrency portfolio intelligence platform designed to bridge the gap between complex multi-chain crypto holdings and actionable insights. By combining real-time blockchain data aggregation across 12+ networks with advanced artificial intelligence, Muntze transforms how users understand, analyze, and manage their digital assets.

The platform introduces a conversational AI agent capable of answering natural language queries about portfolio performance, market conditions, and investment strategies—all personalized to each user's actual holdings. Unlike traditional portfolio trackers that simply display numbers, Muntze tells users **why** their portfolio is performing a certain way and what they might consider doing about it.

The $MUNTZE token serves as the native utility token powering premium features and, in future phases, AI-driven autonomous trading execution.

The Problem

Fragmented Portfolio Visibility

The average active crypto investor holds assets across 3-5 different wallets on multiple blockchain networks. Ethereum, Solana, Arbitrum, Base, Polygon, Bitcoin—each requires different tools, explorers, and interfaces to monitor. This fragmentation creates blind spots and makes holistic portfolio analysis nearly impossible.

Information Without Intelligence

Existing solutions fall into two categories: Portfolio Trackers that show balances and price changes but offer no analysis, and AI Chatbots that provide general information but have no access to real-time market data or user portfolios. Neither solves the fundamental problem.

The Execution Gap

Even when investors know what they want to do, execution remains manual and error-prone: switching between platforms, managing gas fees, timing trades, and maintaining strategy discipline.

The Solution

Muntze addresses these challenges through three core capabilities:

Unified Multi-Chain Aggregation

Connect wallets across 12+ networks. View all holdings in one intelligent dashboard.

Conversational AI Intelligence

Ask questions in natural language. Get personalized answers based on your actual holdings.

Strategy → Execution → Autonomy

Define strategies in plain English. Simulate, then execute. In development.

Platform Overview

Home Dashboard

Total net worth, 24h performance, trending tokens, market pulse, and quick AI access.

Portfolio View

Allocation breakdown, performance heatmap, AI insights, transaction history, and holdings detail.

AI Agent

Persistent memory, inline charts, tool visibility, multi-turn conversations, and suggested prompts.

Market Overview

Top cryptocurrencies, sector performance, market sentiment, and trending analysis.

Technical Architecture

Muntze employs a modern, scalable architecture designed for real-time data processing and AI inference.

AI Agent Architecture

Built on a ReAct (Reasoning + Acting) architecture using LangGraph with intelligent 3-tier query routing for optimal response times.

$MUNTZE Token

$MUNTZE is the native utility token of the Muntze platform, designed to align incentives between the platform and its users while providing tangible utility within the ecosystem. Live on Pump.fun and Solana DEXs.

Status

Fair Launch Model

- •No Presale: No private investors or early access deals
- •No VC Allocation: No venture capital preferential treatment
- •Equal Opportunity: Everyone participates on the same terms
- •Locked Dev Wallet: Developer tokens locked to demonstrate commitment

Autonomy

For detailed feature breakdowns, visit our full roadmap page.

Security

- **Read-Only Access:** We never request or store private keys. All wallet connections are read-only.
- **Encryption:** All data encrypted in transit (TLS 1.3) and at rest (AES-256).
- **Infrastructure:** Deployed on Google Cloud Platform with SOC 2 compliance.

Disclaimer

This whitepaper is for informational purposes only and does not constitute financial, investment, legal, or tax advice. Cryptocurrency investments carry significant risk of loss. The $MUNTZE token is a utility token and should not be considered a security or investment. Past performance does not guarantee future results. Please conduct your own research and consult qualified professionals before making any investment decisions.
