NavCoin Whitepaper

Abstract

What is NavCoin?
NavCoin is a decentralized cryptocurrency that uses peer-to-peer technology to operate with no central authority or banks; managing transactions and the issuing of NavCoin is carried out collectively by the network. NavCoin is open-source; its design is public, nobody owns or controls NavCoin and everyone can take part.

NavCoin has a range of sleek and intuitive wallets that allows you to easily manage your NavCoin and keep your funds secure.

Faster Transaction Times
No need to wait 10 minutes. Send NAV anywhere on the planet instantly and have it confirmed within 30 seconds.

Energy Efficient
NavCoin uses Proof of Stake which only consumes a fraction of the energy used to mine using Proof of Work.

Secure Wallets
There are a variety of NavCoin wallets which help you keep your private keys secure on most operating systems.
