CRYP2NOVA

Archived copy · cryp2nova.com

Neurobro is your all-in-one AI for finance. It's a research and trading app for web and mobile that puts AI market analysis, your portfolio, and a non-custodial wallet in one place - so you can look into a market and act on it without switching tools.

What you can do?

1. **Research the markets.** Ask Neurobro a question and get an answer in seconds, with the numbers and sources behind it. "Is ETH overbought right now?" "What moved gold today?" "Any new Base tokens with real volume?" It covers crypto, stocks, forex, commodities, and prediction markets.
2. **Trade on what you find.** See something worth buying? Trade it from the chat or the trading screen. NeuroWallet is built in and non-custodial, so you hold your own keys and funds and Neurobro never takes custody.

One account, on every device

Your **Neurobro Pass** is a single login for Neurobro Web and the mobile app. Sign in once and your chats, preferences, and plan are there on both. Start a question on your phone and finish it on the web.

Where to use Neurobro?

↗

Neurobro Web

The full web app - research any market, read the charts and dashboards on a big screen, and trade.
↗

Archived copy · cryp2nova.com

Mobile App (iOS & Android)

Neurobro in your pocket - research, news, and trading for iOS and Android.

How it works?

Behind each answer, Neurobro runs a set of specialized agents - more than 200 of them - that read prices, on-chain activity, news, and social sentiment, then pull what they find into one reply. For the longer version, see how Neurobro works.

What makes it different?

Most tools analyze a market and then send you somewhere else to trade. Neurobro keeps both in one app on one account, so you can go from a question to a filled order without switching apps or giving up custody of your coins.
