ABSTRACT:

Newscrypto.io is a blockchain-linked ecosystem that combines everything crypto-related to form the best virtual place for money-making decisions.

The platform is constructed of advanced market indicators, Newscrypto school program, community prediction section, unique trading tools, and price analysis segment. It has everything built in one place, and it is designed for experienced traders as well as beginners who want to gain an upper hand in crypto trading.

Newscrypto is a non-ICO / non-IEO project meaning we never had and never will raise any external capital since we are self-sufficient, with a product that already works.

Newscrypto platform is a ready to use product today, with arguably the best-structured ecosystem underneath it. It was developed to deliver everything a crypto trader needs. Based on the tools and features provided, Newscrypto.io facilitates a smooth trading experience for users so they can trade with confidence and security.

The backbone of the Newscrypto ecosystem is the Newscrypto Coin (NWC token). Its main utility function resides in unlocking access to needed market information on the platform for profitable trading. The token has a burning system meaning its total supply is being organically reduced.

A unique smart contract empowers the community-driven ecosystem which grants NWC token to be an effective trading tool and an attractive asset for investors. The token is built on Stellar blockchain which provides the fastest, reliable and low-cost transactions.

MISSION:

Newscrypto solves the problem of finding the right information at the right time and guides investors from blindly investing in crypto markets they might not be familiar with by helping them in making rational investment decisions.

CRYP2NOVA

Company mission is to give every user the confidence and knowledge regarding crypto trading by availing to them the access to highly profitable blockchain-based instruments for money-making decisions. Newscrypto is poised to be the leading crypto place for every crypto enthusiast in the future.

NewsCrypto's vision is to shape the crypto trading industry by building platform that is an ideal home for profitable trading decisions for the global cryptocurrency community with which we will chart the future together.

INTRODUCTION:

PROJECT BACKGROUND

Newscrypto.io the best place in the crypto world for money-making decisions.

Unlike most newly developed crypto projects, the Newscrypto platform is an already tried and tested product used by world's top traders. The concept of the platform goes back to 2015 when the founding team got involved in crypto trading. Spotting deficiencies in the crypto trading industry and lack of reliable market information sparkled development of the structure and ecosystem that would disrupt the cryptocurrency trading industry forever. In October of 2019, the idea became reality.

Newscrypto is a non-ICO entity. Contrary to the majority of new projects, we didn't collect ridiculously high soft cap or seek any external equity funding. Everything is self-funded as the project is going straight to the market proving that it's here to stay for the long run.

The Newscrypto team now consists of world top traders and advisors that are being financially compensated entirely in the form of our NWC token. This indicates that the project's success is directly correlated to the value that the platform provides to the community thereby making the team even more motivated to deliver the best possible results every day.

PROJECT SPECIFICATION

The Newscrypto platform is divided into three distinct levels which are split as **Beginner Tier**, **Intermediate Tier** and **Advanced Tier**.

The Beginner tier consisting of essential tools and indicators is available for free soon after registering an account. The other two tiers are can be unlocked with the NWC token. Every user has to pay a weekly, monthly or yearly fee corresponding with the level of access required respectively to the tools and indicators programmed in-house by the Newscrypto Technology team. School lessons are completely free for everyone as it is in our interest to educate people about the world of crypto to expand and increase the potential base of new crypto personas. The community prediction section is devoted to speculative traders to post their market predictions and even earn great weekly rewards in the form of NWC tokens in the process.

As mentioned before, users use the Newscrypto token to unlock the Intermediate and Advanced tier where they gain crucial market information. The Newscrypto platform will also grant access to the most advanced price analysis reports and premium alerts as the platform evolves. The NWC token utility is synergistically linked to the platform. We also instantly burn every 20% of the membership bought on the platform and this means that the total supply of NWC tokens is being reduced as the user base grows.

The hardworking team is seized with bringing the project's future plans to reality and these extend even outside of our platform as the team plans to open virtual offices providing live lessons on crypto trading. Furthermore, it is within the company's roadmap to launch an incubator to allow Newscrypto members to start their blockchain projects while Newscrypto will provide all the needed support around it.

Archived copy - cryp2nova.com

SYSTEM ARCHITECTURE

The Newscrypto platform is built to support high data loads and reads from blockchain network participants with exact rules which data to extract. The platform's architecture updates within milliseconds in different environments, even those outside of the blockchain core focus.

Although a single piece of data is typically less than 100 bytes, the system is designed to collect potentially thousands of measurements per batch. Since a batch may include data from multiple sources, the platform will need to handle terabytes of data daily. However, the platform does not only collect data from the blockchain network but also provides it to its members.

To achieve this platform capacity, Newscrypto has created a custom software that integrates with the blockchain and a distributed storage system.

CHALLENGE:

Cryptocurrencies are spreading like no other financial instrument at this moment. Countless people are intrigued to buy crypto assets but they face two main setbacks making them anxious to do so.

- Crypto is perceived as a financially unstable space, and the fluctuations in the market make people fear that they will lose their value.

- Most prospective investors do not know how or where to buy cryptocurrencies as they lack what seems to be basic knowledge to people more familiar with crypto.

There is also a huge growth in internet sites containing manipulated information which may end up misleading a less or an inexperienced investor. Compounded by market fears mostly stemming from the highly publicised horrific crash of January 2018, people's confidence in cryptocurrencies has continued to fall resulting in traditional financial services being overly expensive beyond the reach of many people due to risk factors.

There are a lot of inconveniences with the currently existing crypto exchanges which are quite hard to understand without proper guidance, especially charts which are a crucial tool in trading. This is why people end up blindly investing and having to rely on pure luck to save them. It is a sad case similar to the proverbial small fish swimming in a pool full of sharks.

SOLUTION:

Newscrypto.io is the most advanced crypto-orientated platform to date consisting of everything a trader needs; the needed security, knowledge and confidence all in one. The platform was created for those who want to master the cryptocurrency markets and reach new financially heights.

Specially programmed indicators on Newscrypto can recognize any unstable market reactions and shows you the trends so there are no unexpected occurrences. The platform monitors real money deposits and withdrawals at all major fiat gateways, follow big money movements on the exchanges to control the whale's actions and much more.

CRYP2NOVA

But firstly, it’s important to educate new members to become a part of the crypto world. The Newscrypto School program was put together by the most experienced crypto leaders in the industry covering everything that is vital to know. The whole section is designed to cater for everyone, from the very beginnings to expert knowledge thereby preparing the community for real-life trading.

The scope of NewsCrypto’s content and information is wider than any other platform available today. With a cheaper price range for any payment plan users choose, Newscrypto is financially accessible for everyone.

PLATFORM

TRADING INDICATORS AND TOOL

Newscrypto platform is essentially the nerve centre for money-making decisions in the crypto world. It targets those who are already expert traders as well as the new generation getting into crypto trading. Newscrypto solves the problem of finding the right information at the right time and guides investors from blindly investing in crypto markets that they might not be familiar with by helping them in making rational investment decisions. It serves as the first and most reliable source of knowledge and insight in the market.

The platform provides data on buy and sell orders, best exchange rates, gives detailed information about smart money movements, displays fundamental and technical analysis and deep market insight on price movements. The platform works for you, saving time and energy in every aspect of the crypto world by having crucial insights in the palm of your hand.

Newscrypto platform is divided into three major tiers; **Beginner**, **Intermediate** and **Advanced** and each of them caters for a specific user type.

The Beginner Tier is accessible by just registering on the platform and consists of basic essential tools and features a crypto trader needs, from specially filtered breaking news, charts, currency watchlist, portfolio manager, performance indicator, and other bitcoin-oriented indicators. These are every day features a trader needs, assembled in one place to give a quick peek into the crypto market and your investments.

The Intermediate Tier comprises of next-level features with more market insight. Users can take advantage of price differences between several markets listing the same coin with the arbitrage feature. Other features include sentiment, stock to flow model, trading indicators like genesis, bitcoin to gold comparisons, relative strength indexes, trading options and many more. The features in this tier allow users to make a step towards more professional trading.

The Advanced Tier unlocks the most advanced specially programmed indicators to get an edge over other traders in the crypto trading world. You can track every big amount transaction in the market with whale alert, analyze the correlation between assets, see how much FIAT is flowing in and out on crypto exchanges, deep bitcoin cycle analysis, historical price movements frames, bitcoin relative changes and so on. This "package" of indicators allows you full access and control of all the action in the world of crypto.

New indicators and tools are constantly added to the spectre of the provided features. The project's roadmap indicates a complete range of necessary features that will continue to be unveiled as we progress.

NEWSCRYPTO SCHOOL

Newscrypto.io has developed a school program suitable for beginners and those who want to expand their knowledge about trading with cryptocurrencies. The school program, designed by the world's best traders and crypto minds is completely free as it is in the project mission to educate as many people as possible to make crypto trading accepted by the masses. The educational program was designed to provide users with a powerful theoretical and practical experience and educate them about possible mistakes in the crypto world.

Archived copy - cryp2nova.com

The school program is divided into different groups which cover the Basics, Charts, Trading strategies, Economics, Crypto development, Everything about Newscrypto tools and many more in the future. In each group, there are lessons divided into chapters. At the end of each lesson, there are prepared interactive tasks. Each lesson has a text task in which you have to choose the right answer and tasks based on charts where you have to choose the right chart pattern.

These lessons grant you points if you answer questions correctly and move you forward on the platform progress bar. Upon finishing all lessons and tasks you get a title based on the points you would have gathered through Newscrypto school. Newscrypto will incentivise users and members for their knowledge and skill displayed while learning, this effectively means that they will get advanced membership unlocked free of charge upon completing their tasks.

COMMUNITY PREDICTIONS

In the world of cryptocurrency, information is power. The Newscrypto community prediction section is created for members to interact which each other and view the predictions that other crypto traders make. There is also live chat implemented so the section which effectively serves as a mini social media. We collect predictive charts from the most experienced traders to those who are just starting. With the like mechanism, you can sort and choose the best ones. There is also a play option, that shows how your prediction is doing in the current situation, thereby presenting a great opportunity to test and improve your charting skills.

Newscrypto community predictions are also a great way to earn NWC tokens. Each week there is a distribution of NWC tokens to the top three contributors on the site. By rewarding members, the section is alluring for world top traders making the content even better. With regular posts, Newscrypto users can have a real-time overview of the market.

PREDEFINED CHARTS

Charts are one of the most important tools for crypto traders. Newscrypto has a wide selection of charts with a variety of options for members to use. They are not only used to track the price movement for a particular coin but also to compare Bitcoin with any flat currency in a particular period of time.

The Newscrypto team took a step further and developed predefined charts which are regularly updated. There are more than eight pairs with support and resistance lines already drawn on the chart with trend lines systematically added by the team. These charts are professionally drawn by the world's top traders but are fully customizable so you can also draw on them and move things around. The lines plotted on these charts have an extensive history value and have been extensively market-tested. The asset movements prove that Newscrypto predefined charts are one of the most reliable sources of insight in crypto.

MARKET

With cryptocurrencies gaining mainstream attention like no other financial instrument at moment, a countless number of people are intrigued to buy crypto assets and at the same time, there is a huge upsurge in internet websites providing information about cryptocurrencies. The ongoing buzz from corporate organizations, as well as individuals is making cryptocurrencies one of the most tradable assets right now. Each year has seen an influx of new players in the crypto world. The largest numbers were witnessed soon after the 2017 bull run which drove the first institutional mainstream adoption brought about exponential growth. As the community continues to grow and more people get involved in crypto trading and investing, the cryptocurrency service offering institutions will fight for every user and try to satisfy all their desires in order to build brand loyalty.

Some real-life facts include the fact that a post about bitcoin appears every 3 seconds on social media, and the blockchain technology market size is expected to reach $57 million by 2025 registering a Compound annual growth rate (CAGR) of 69.4% from 2019 to 2025. Bitcoin popularity is shown by the fact that by 2019 there were a total of 153 million bitcoin user addresses worldwide. At the same time around 2,000 different cryptocurrencies are available for trading. As a result of this market growth, people are eager to find a place that will contain all the needed information about the cryptocurrency market.

The Newscrypto Platform test rollout was made with 10.000 users to help improve the platform's ability to provide seamless services to a large number of users. By getting real feedback the team was able to design the platform appropriately to reach as many trader's needs as possible. The test market conclusion was that this product is needed, desired and beneficial for crypto traders. On average their trading results got better as compared to before they used the Newscrypto platform, showing the added value by the features being provided.

PAYABLE MEMBER PROJECTIONS:

The expected projections of paid memberships show that we expect 15000 paid members in the first year, 50,000 the second year, 120,000 in the third year and beyond in the coming years.

NEWSCRYPTO COIN - NWC

NWC is the backbone and the heart of NewsCrypto network.

The Newscrypto.io platform is being driven by a newly developed token called Newscrypto with the ticker 'NWC. The NWC token's main utility resides in unlocking access to unique smart tools, information and market movement analytics in the shape of Newscrypto platform features. It is built upon the Stellar blockchain and has both utility and value-transfer functions within the network. A unique smart contract empowers a community-driven ecosystem that grants NWC to be an effective trading tool and an attractive asset for investors, compounded by NewsCrypto's token burning system. The Newscrypto platform is an established product with ready to use solutions for profitable crypto trading. The team's main objective is to lead the way by becoming the number one platform for trading decisions and enabling cryptocurrency mass adoption in which NWC token plays a major role.

TOKEN ECONOMICS

Token name: Newscrypto Coin
Symbol: NWC
Total supply: started at 280.000.000 which is being reduced due to automatic token burning (more on this in the ecosystem)

Token Allocation:

Token public sale	50,00%	140000000
Retained by the company	32,09%	89852000
Community development	14,41%	40348000
Reserve funds	3,50%	9800000

Token public sale:

Development	50%	70000000
Research	30%	42000000
Operations	15%	21000000
Legal	5%	7000000

Retained by the company:

Founders	83,47%	75000000
Team / advisors	16,53%	14852000

Community Development:

Bounty	21%	8473080
Ambassadors	73%	29454040
Other	6%	2420880

Archived copy - cryp2nova.com

TOKEN MECHANISM

Apart from token burning, the accumulated funds from subscriptions are used to engage new users, reward active members and develop new solutions that provoke a mutually beneficial outcome for everyone involved.

Members will have to pay a weekly, monthly or yearly membership fee in order to access the Intermediate and the Advanced tiers for tools and information provided on the Newscrypto platform. On the other hand, everyone behind the platform, namely the team will receive their financial compensation entirely in Newscrypto tokens. This means that it is in the team's best interest to provide a quality user experience and maximize the value of the NWC token as the team's compensation is interlinked to the success of the platform. The success of the Newscrypto platform is measured by the members and community in the form of the positive movements in the price of the NWC token.

STELLAR BLOCKCHAIN

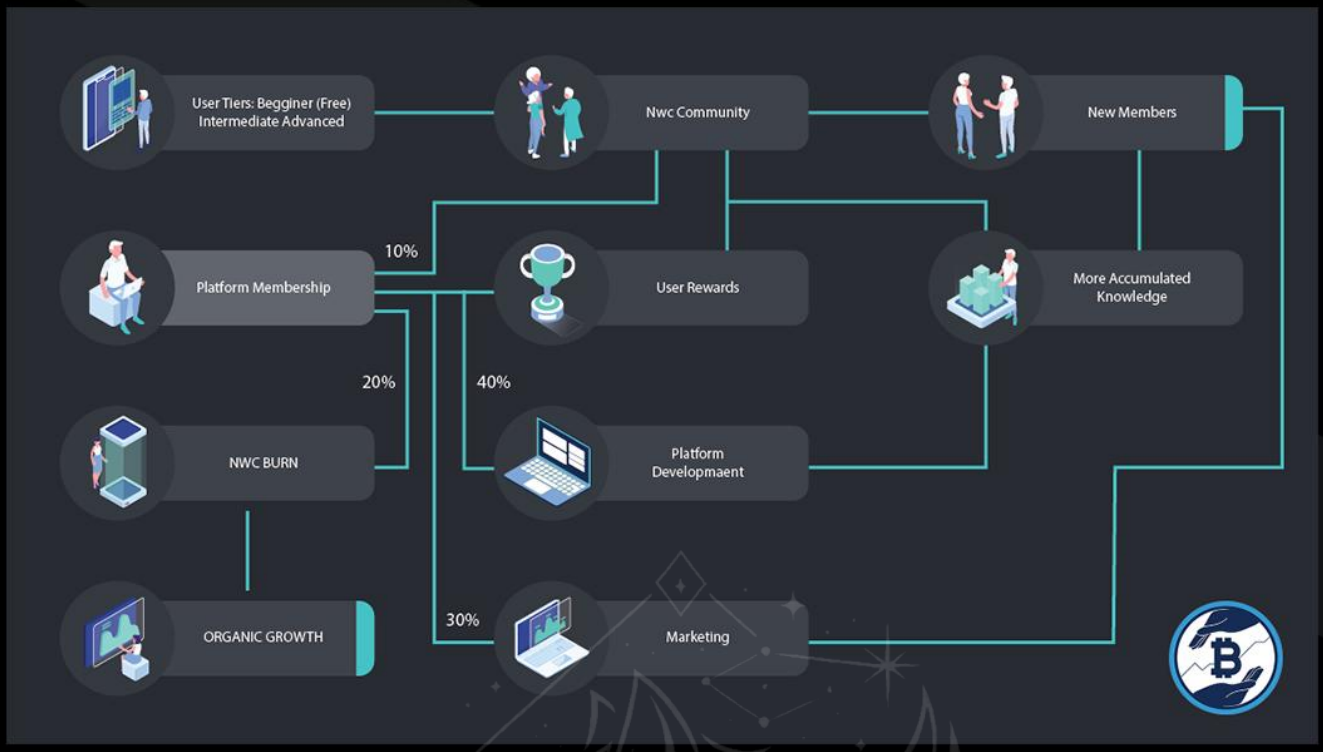

The Newscrypto coin is a stellar lumen compliant token. Stellar is a decentralized payment network that allows a cross-asset value transfer by using a distributed ledger on the blockchain. It is primarily a platform that connects banks, payments, systems, and people. With its core, you are able to move money quickly, reliably and at almost no cost.

The Stellar blockchain has also gone a step further to ensure security implementing various authentication constraints and encryptions. Here are many benefits of Stellar especially the build-in decentralized exchange plays a major role. The average settlement time for the Stellar transaction is 5 seconds. This gives Stellar a tremendous advantage over other alternatives. The transaction fee on the Stellar network is considerably small. An approximation states that for the fee to total 1XLM, it would have to contain 100,000 transactions. Furthermore, it is also very fast as it can process 3000+ transactions per second. The process of how it works is shown in the image below.

CRYP2NOVA

Archived copy - cryp2nova.com

NEWSCRYPTO ECOSYSTEM

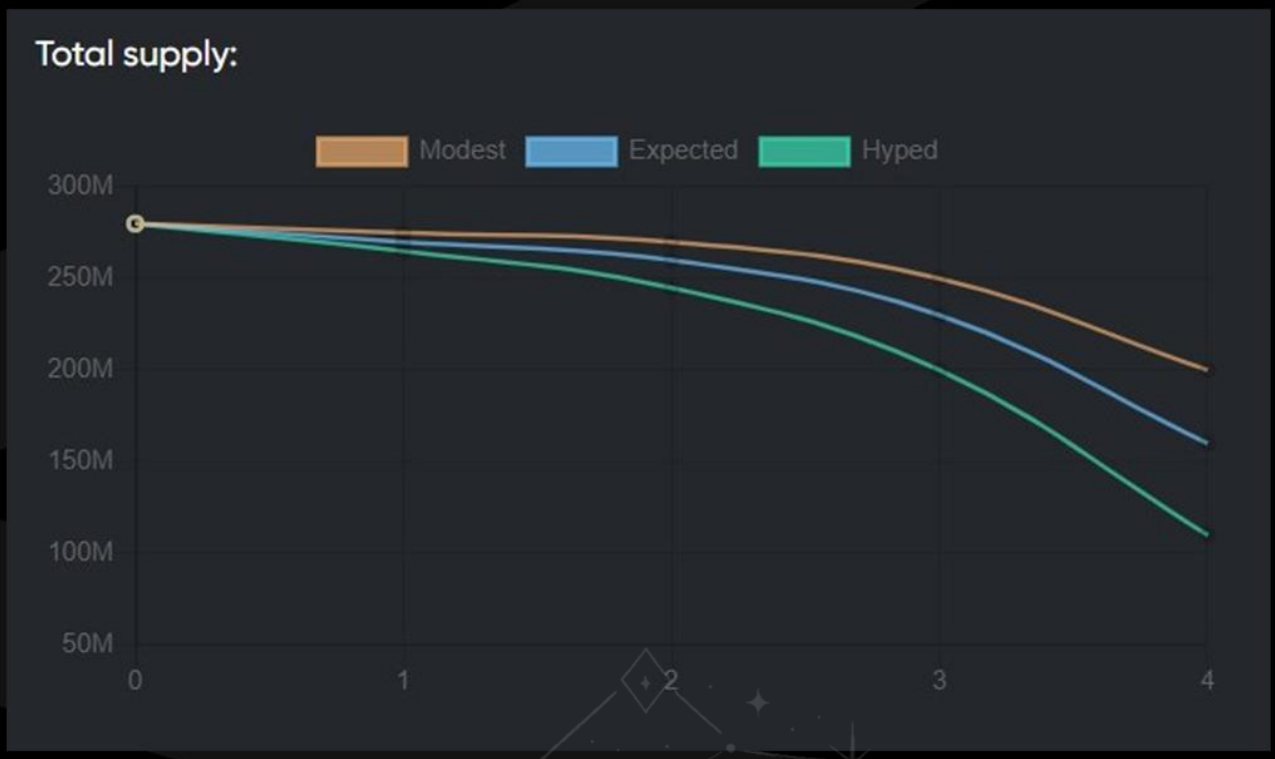

The foundation of the Newscrypto ecosystem is the Newscrypto Coin. If a member wants to access the platform's advanced services and indicators, which provide crucial market information, they have to pay with NWC tokens, since it is the only currency in which the Newscrypto services can be settled in. The ticker NWC initially issues 280.000.000 Newscrypto tokens.

From the platform membership fees, 20% of the tokens are burned providing an organic growth for Newscrypto coin. 10% is intended for the community through different user engagements like weekly community prediction rewards and social media tasks. 40% of the membership amount is meant for platform development so the platform grows, and the team can provide more knowledge and market insights for Newscrypto members. 30% goes into marketing to acquire new members and build the community base which rounds the circle back to the organic growth of Newscrypto coin.

TOKEN BURNING

Newscrypto offers a limited supply of tokens. The core of the token development system is token burning. This means that Newscrypto will automatically burn / permanently remove 20% of NWC tokens received from membership fees. This process of token burning reduces the total supply of NWC tokens which results in the organic growth of the token value and in the process benefiting investors and token holders. Newscrypto is committed to the continued provision of a transparent and beneficial service to the community, because of that, the team is obliged to burning as many tokens as received from memberships. Any kind of token abuse and token manipulation is strictly forbidden and inconsistent with the project's mission. When the goal of 1 million members is reached, the company will dispose of all remaining tokens if any. The total supply of tokens is 280.000.000 and the estimated circulating supply in 5 years is 90.000.000. With the process of burning NWC tokens, Newscrypto keeps the demand and price of the tokens as high as possible.

Archived copy - cryp2nova.com

ADVANTAGES

In contrast to other crypto information providing platforms, Newscrypto provides tried and tested product, with a much more advanced system, at a cheaper price with even free access to essential tools and educational program. With a 24/7 operating system, Newscrypto is the first source of news concerning market movements, smart market analysis tools and the go-to place for many successful traders. Meanwhile, the NWC is being listed on various credible and top cryptocurrency exchanges giving its holders and users a fair return, security as well as confidence.

Platform Advantages:

- Ready to use solutions with every crypto-related information in the market
- Access to predefined chart layouts made by world best traders
- Exclusive real-time market indicators in crypto
- A place when you can earn free tokens and interact with other global traders
- A much cheaper alternative than any other competitor
- Run by the best-structured ecosystem in crypto

Token advantages:

- No external fundraising
- Proven utility on a working platform
- Automatic burning system
- Listed on credible exchanges
- Ultra-fast and cheap transactions
- Built on a safe blockchain
- Organic growth making it a perfect asset for investors

Archived copy - cryp2nova.com

FUTURE DEVELOPMENT

Along with the Newscrypto platform, the future plan involves virtual offices where Newscrypto team would provide live lessons with top crypto advisors and offer mentoring by professionals. This service will assist anyone seeking to learn more about crypto, looking for a trading mentor or those who are eager to take the step further and start their journey of cryptocurrency entrepreneurship.

Newscrypto also intends to offer its incubator which will serve the community as an opportunity to start their blockchain projects whilst getting all the support needed. The Newscrypto team will provide the development expertise, marketing help and all the know-how needed for a successful project. Having a physical presence would also make the reaction times much faster and improve communication. The team's focus is to build the most innovative incubator to date and enlarge the Newscrypto community through successful business alliances.

CONCLUSION

Cryptocurrency is gaining market and public attention like no other financial instrument at the moment. Many players will try to take advantage of the investment opportunities in the industry as it is projected to erupt in the future. One thing that is for sure, Newscrypto is and will be the best place in the crypto world for money-making decisions. The Newscrypto project is built for the long run with an innovative roadmap with realistic and global changing goals.

Newscrypto is already proving that it can support itself and at the same time offering traders everything they need to make profits; the number of members is expected to surge. Covering every aspect of crypto, the platform strives to become the go-to place for all of the items and tools provided on the platform, education, trading and market analysis, community predictions.

Newscrypto is fighting the prevailing negative misconceptions that cryptocurrencies are not a safe investment. With the platform, the Newscrypto team aims to solve the problem of finding a trustworthy source of information, tools and insights by offering members the best user experience possible in the complex world of crypto trading. The company positions itself to become the Google of cryptocurrency, shaping the industry in the right way.

With the growth in platform users, the Newscrypto ecosystem setup automatically reduces the NWC token total supply and induces price organic growth. With our practical approach to the market, we strongly believe that the NWC token will become one of the mainstream cryptocurrency, having utility value on the leading crypto trading site.

Newscrypto is here to shape the future of crypto trading. Let's do it together.
