Introduction

Copy

Nora represents a paradigm shift in how mental health is supported and delivered. Built at the intersection of cutting-edge AI and blockchain technologies, Nora introduces customizable, decentralized AI agents to scale mental wellness across individual, therapeutic, and business environments.

Vision and Mission

- **Empathy at Scale**: Provide mental health support to anyone, anywhere, anytime.
- **Web3-Powered Control:** Enable users, therapists, and businesses to maintain control through enhanced privacy and permission-based access.
- **Custom AI Agents**: Enable personalized, culturally relevant interactions that adapt to user needs.

Live Features

- **AI Agent on Twitter**: Talk to Nora ↗ for real-time mental health support.
- **Mobile Apps**: Talk to Nora privately and engage in mental health community. Available on iOS ↗ and Android ↗.

Roadmap Highlights

1. **Personalized Therapists**: Empower users to design their own mental health AI agents.
2. **Therapist Cloning On-Chain**: Scale therapeutic practices through tokenized mental health AI agents.

3. **Business Integrations**: Bring AI agents into workplace tools like Slack for wellness and productivity.

Team

Currently, we're a team of fewer than ten people, primarily generalist programmers each with at least two strong specialties. We come from diverse backgrounds and frontline experience at industry giants like Microsoft and Amazon, as well as startups pushing the boundaries of innovation. This breadth of experience gives us a deep well of knowledge and a shared commitment to excellence. We work closely with product and design teams, always placing the user at the center of our decision-making. Our focus is on continually pushing the boundaries of what could be even more awesome for the end user.

Why Nora and Why Now?

The convergence of rising mental health needs, advanced AI capabilities, and the decentralized promise of Web3 creates the perfect environment for Nora's impact. With stigma around mental health decreasing, demand for affordable and accessible solutions is at an all-time high. Nora is poised to lead this transformation.

CRYP2NOVA

Key Statistics:

- Over **1 billion people** globally face mental health challenges.
- Only **1 in 3** individuals in need of mental health support receive it due to high costs, stigma, or lack of availability.
- The **digital health market** is projected to grow at a compound annual growth rate (CAGR) of 28% by 2030.

By addressing these gaps with empathetic, scalable AI agents, Nora ensures mental health resources are no longer a privilege but a universal right.
