NovaChargeX – NCX LLC (Delaware, USA)

Patented Hybrid Regenerative Clean-Energy System | World Future Award Winner 2025

1. Executive Summary

NovaChargeX – NCX LLC, registered in Delaware (U.S.A.), is the official entity owning all intellectual property and patent rights for the NovaChargeX Hybrid Regenerative Energy System. The system represents a new generation of clean-energy innovation designed to deliver continuous, fuel-free, and weather-independent power with exceptional efficiency and scalability.

2. Recognition & Verification

🏆 Winner — World Future Awards 2025 for 'Best Hybrid Regenerative Clean Energy System'. This recognition was issued by the World Future Awards, based in One World Trade Center, New York, U.S.A., confirming NovaChargeX as a global leader in clean, sustainable energy.

Public verification: https://worldfutureawards.com/hybrid-regenerative-clean-energy-system-novachargex-2025/

3. Legal Entity & Intellectual Property

Registered Name: NovaChargeX – NCX LLC
Jurisdiction: State of Delaware, United States of America
File Number: 730991046 (2025 Certificate of Formation)
Registered Agent: ZenBusiness Inc.
Patent Status: Patent Protected / Active Filing (U.S. & Turkey)
Ownership: All rights assigned to NovaChargeX – NCX LLC.

4. Technology Overview

The NovaChargeX system integrates hybrid regenerative logic and intelligent energy balancing to provide stable, continuous clean energy. It operates autonomously, independent of external weather or fuel conditions, ensuring over 90% operational stability. The system supports both complementary and standalone modes for flexible integration into existing energy networks.

5. Economic & Environmental Impact

NovaChargeX technology reduces energy storage requirements and grid dependency while maximizing energy yield. In verified performance tests, it has achieved a 233% daily return ratio from minimal input power. Scalable from residential (1 kW–50 kW) to industrial (1 MWh+) systems, it offers significant land and cost savings.

6. NCX Token & Bitbond Integration

Token Name: NCX Token
Type: ERC-20 compliant security token
Issuer: NovaChargeX – NCX LLC (Delaware, USA)
Use Case: Licensing rights, royalty logic on system output, and governance participation.
Value Base: Award-recognized intellectual property and system revenue potential.
ESG Classification: Clean Tech / Regenerative Infrastructure.

7. Market Position

NovaChargeX is positioned as a next-generation hybrid alternative to solar and wind technologies. It eliminates weather dependency, reduces intermittency, and ensures round-the-clock clean energy delivery. Supported by international patent filings and award validation, it represents a global breakthrough in regenerative clean-energy solutions.

8. Legal Notice & Disclaimer

This whitepaper is for informational and investor-relation purposes only. NovaChargeX – NCX LLC does not sell retail energy products. All deployments are managed through licensed partners and Bitbond-verified digital asset tokenization. All rights reserved © NovaChargeX – NCX LLC 2025.
