Introduction

Investors , get ready for xNPCS, the AI-agent powerhouse joining the NPCS ecosystem. This isn't some meme coin gimmick; it's a sharp, AI-driven tool built to dominate the Solana trading scene. Picture this: real-time social media vibes and on-chain data sliced and diced, delivering you killer insights—think liquidity heatmaps, cycle-top signals, and heads-ups on overbought or oversold action. Plus, you'll get the scoop on big exchange moves most traders never see.

This comes from the crew that turned NPCS, a meme token, **from a $10,000 market cap into a $41 million beast—yep, a 41,000x rocket ride.** They also dropped an NFT collection that sold out and shot to #1 on Solana. Now, they're unleashing xNPCS, their latest monster project, and it's set to turbocharge the whole NPCS ecosystem—NPCS, xNPCS, and those top-tier NFTs, all working together.

xNPCS is your trading wingman, built by a team with a proven knack for delivering huge wins. Stake early, cash in on exclusive perks, and watch this AI grind non-stop to boost your gains. AI-agent projects are about to blow up this cycle, and xNPCS is leading the charge. Jump in—this is going huge. 🚀

Our Vision

xNPCS AI Agent protocol is aiming to ignite a crypto revolution—where cutting-edge AI fuses with the meme culture to empower every holder. Real-time, blockchain-verified insights that are instant accessible and alerted to every community member, providing a wildly insightful experience.

By adopting advanced trading intelligence with the viral energy of community-driven markets, xNPCS is redefining how users tap into market data whilst unleashing a movement that puts power, fun, and profit into its communities hands.

What is $xNPCS and Why is it Needed?

$xNPCS is the native token of the xNPCS AI Agent protocol, a fusion of artificial intelligence and blockchain innovation tailored for the crypto frontier.

It's the key to unlocking a next-generation AI agent that doesn't just analyze markets—it decodes them, delivering holders a decisive edge in a landscape where timing is everything.

In a world of fleeting trends, opaque data, and relentless volatility, $xNPCS is needed because it levels the playing field—democratizing access to elite-level insights typically reserved for seasoned traders and institutional players. It's not just a token; it's a ticket to thrive in the wild, emotion-fueled, opportunity-rich chaos of crypto.

The AI-Agent Sector in Crypto: Growth, Significance, and Future Potential

The AI-agent sector in crypto is a burgeoning field with a current valuation exceeding $13.8 billion and projections suggesting growth to $250 billion by the end of 2025, potentially reaching tens or hundreds of billions by 2030. Its future significance lies in revolutionizing trading, DeFi, and governance while broadening access to crypto markets.

The launch of $xNPCS - NPCS AI AGENT - aims to capitalize on the substantial opportunity the AI agent industry offers and will be at the forefront of the parabolic growth the sector experiences in the coming years.

As it matures, balancing innovation with stability will be key to realizing its multi-trillion-dollar potential, as envisioned by industry leaders like Nvidia's Jensen Huang. This sector is not just a trend—it's a foundational shift in how crypto operates and grows.

How the AI Agent Will Evolve into a Powerhouse

The xNPCS AI Agent isn’t static—it’s a living, evolving entity built to dominate the crypto intelligence game. Over the coming years, our team will relentlessly enhance its capabilities, transforming it into an indispensable ally for $xNPCS holders.

Archived copy · cryp2nova.com

Here’s how:

On-Chain Mastery: The agent will dive deeper into blockchain data—tracking wallet movements, liquidity shifts, and smart contract activity in real time. Forget outdated chart patterns; this AI will harness raw, unfiltered on-chain indicators to spot opportunities and risks before they hit the mainstream.

Market Knowledge Expansion:

We’re feeding it an ever-growing library of market dynamics, from micro-trends in DeFi to macro shifts in sentiment across X and beyond.

CRYP2NOVA

Archived copy · cryp2nova.com

Here’s how:

It’ll learn to anticipate pumps, dumps, team wallets that start to dump (rug warnings) and pivots with uncanny precision, drawing from a knowledge base that outstrips even the sharpest human traders.

Elite Tools for All

What sets xNPCS apart is its mission to empower every holder—not just the pros. The AI will distill complex datasets into actionable insights, giving you the same edge as whale watchers and quant funds. Whether it’s spotting undervalued gems or dodging rug pulls, this agent will be your personal market oracle.

Continuous Upgrades

Think adaptive algorithms, natural language processing to parse X chatter, and predictive modeling that gets smarter with every trade. By 2027, we envision an agent so powerful it’s like having a Wall Street analyst, blockchain sleuth, and meme lord rolled into one—working 24/7 for you.

CRYP2NOVA

The result? A tool so potent that $xNPCS holders won’t just ride market waves—they’ll cruise through them, armed with insights that turn chaos into profit.

Integration with the NPCS Ecosystem and Passive Income Opportunities

The launch of xNPCS isn't a standalone event—it's the beating heart of the broader NPCS ecosystem, a synergy that amplifies value for every participant. Here's how it ties in and pays off:

Lucrative Staking Rewards

$xNPCS holders, alongside NPCS meme & NFT owners, can stake their assets to earn a steady stream of $xNPCS tokens. This isn't just passive income—it's a high-yield opportunity designed to reward loyalty and long-term belief in the vision. The new xNPCS staking dashboard makes it seamless: stake, earn, and watch your holdings grow, all while the AI agent works its magic in the background.

Exclusive Airdrops for NFT Loyalists:

We're doubling down on community with lucrative airdrops of $xNPCS reserved for NPCS NFT holders who hold strong—those who haven't listed or sold their NFTs. It's our way of saying thank you to the OGs, turning their faith into tangible gains. For this, we will commit a huge 6.9% of the total supply of xNPCS for airdrops for the most loyal NFT holders

Ecosystem Synergy:

Every $xNPCS staked or earned fuels the ecosystem, powering the AI's development and unlocking premium features. It's a virtuous cycle: the more you engage, the stronger the agent becomes, and the bigger your edge grows.

The "Jeet Tax" – A 2% Sell Tax on DEX:

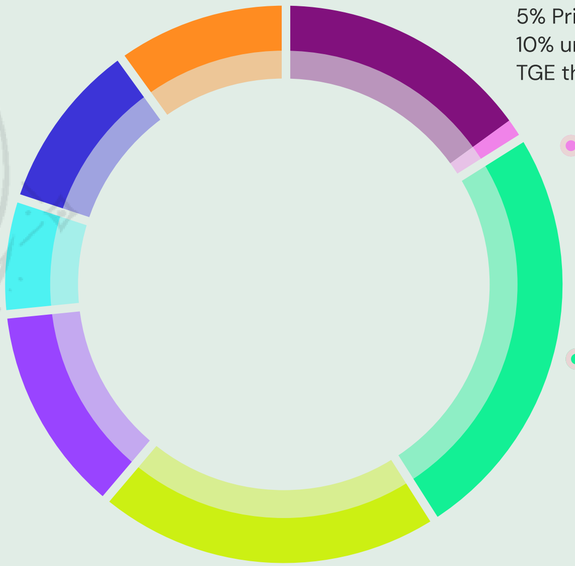

To fuel the staking pool's longevity, we're introducing a 2% sell tax on decentralized exchanges (DEX), affectionately dubbed the "Jeet tax." Every time a short-term seller cashes out, those funds flow directly into the staking pool, boosting rewards for committed holders. This mechanism capitalizes on panic selling and jeets, and ensures the staking pool remains flush with $xNPCS, creating a self-sustaining system that prioritizes and richly rewards those who stake and stay. The "Jeet tax" addition emphasizes a clever, community-focused strategy that incentivizes holding and staking while ensuring long-term sustainability

With staking, airdrops, jeet tax and a dashboard that puts control at your fingertips, xNPCS isn't just an investment—it's a gateway to a thriving, rewarding, and sustained successful crypto lifestyle

Presale Details / Presale Mechanics

Public presale offers early supporters a special opportunity to acquire $xNPCS tokens at a lower price than they will be available at the official token listing.

Pricing Strategy: The $xNPCS token sale will follow a tiered pricing model, rewarding early participants with lower token prices.

The token will be offered across multiple presale phases before its official listing, providing various opportunities for investors to join at different stages.

We value early adopters and their commitment, which is why our presale offers exclusive pricing advantages to those who join first.

Pricing Structure:

Presale 1: $xNPCS = $0.0016
Presale 2: $xNPCS = $0.0024
Presale 3: $xNPCS = $0.0036

Archived copy · cryp2nova.com

Presale Duration and Payment Options:

Presale Start: April 4th, 2025, 13:00 (UTC)

Presale duration: 7 days per round.

Any remaining unsold tokens after Presale will be allocated to staking rewards.

Payment Options:

Participants can purchase $xNPCS using Solana (SOL) and USDT (both on the Solana network).

Contribution Limits:

Minimum: The minimum participation amount is $200 for all presale rounds.
Maximum: The maximum participation amount is $25,000 for each presale round.

CRYP2NOVA

After the Token Generation Event (TGE), participants will be able to claim 10% of their purchased tokens immediately, marking a significant milestone in accessing their holdings. The remaining 90% will be released gradually over a 9-month period, following a linear vesting schedule in accordance with the established cliff and vesting terms.

In the world of AI Agents, those who act fast secure the best deals!

How to buy $xNPCS?

1. Create a wallet with Phantom

Visit phantom.app and follow the simple steps to create a new account with the Phantom app or browser extension.

2. Get some $SOL

Tap the BUY button in the app to purchase Solana, or deposit $SOL to your Phantom wallet from the crypto exchange of your choice.

3. Swap $SOL for $xNPCS

Tap the SWAP icon in your Phantom wallet and paste the $NPCS token address. Swap your $SOL for $xNPCS.

You are a $xNPCS HOLDER!

Referral Program

Unlock additional rewards with our referral program!

Seize the chance to earn exclusive rewards by sharing your unique referral code during our presale rounds.
Not only will you help grow the $xNPCS community, but you'll also unlock additional earning potential – making it an exciting way to be rewarded while contributing to the project's success.

Don’t miss out on this opportunity to maximize your rewards as we build momentum toward the official token launch!

Here’s how it works:

Active During Presale: The referral program is available exclusively during presale rounds and is not applicable during the private sale.
First-Come, First-Served: Participation is limited and operates on a first-come, first-served basis. The total referral program is capped at 1% of the token supply.
Referral Rewards: Referrers earn a 5% reward on every successful purchase made using their referral code.
No Purchase Required: You do not need to make a personal purchase to participate in the program.
One-Level Referral System: The program rewards you only for direct referrals (no rewards for referrals of referrals).
Eligibility: Only new users – those who have never purchased tokens before – are eligible to generate referral rewards.
Uncapped Rewards: There is no upper limit on the referral rewards you can earn, so the more successful referrals you make, the more you can earn.

Comprehensive Guide

Step 1: Connect your wallet

Head over to the buy page and link your wallet. Once connected, you'll receive a personalized referral code.

Step 2: Share your referral link

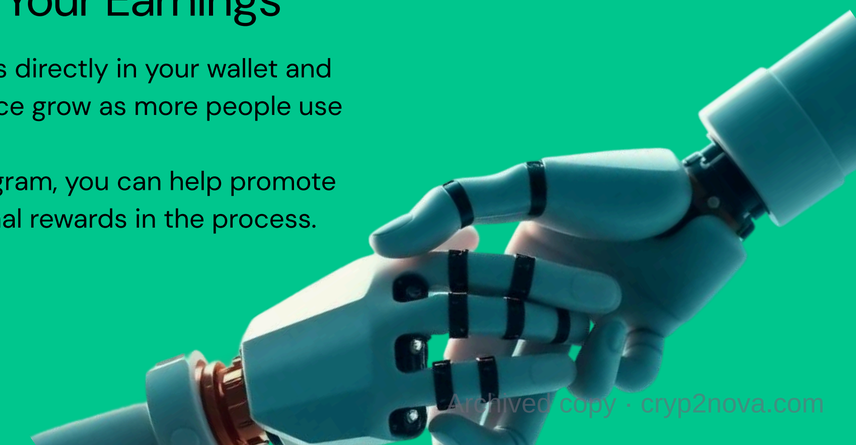

Distribute your unique referral code to friends, family, or members of your community.

Step 3: Referral rewards

For every purchase made using your referral code, you'll earn 5% of the $xNPCS coins bought. Rewards will be distributed in $xNPCS tokens over a period of 3 months, following a linear vesting schedule.

Step 4: Monitor Your Earnings

Track your referral rewards directly in your wallet and watch your $xNPCS balance grow as more people use your code!
By joining our referral program, you can help promote $xNPCS and earn additional rewards in the process.

Staking

Stake Your xNPCS or NPCS Meme Coin and Earn xNPCS

By locking your tokens in our secure platform, you can earn attractive rewards and passive income while supporting the network's stability and growth. Join our community of savvy investors and watch your tokens work for you!

xNPCS AI Agent Protocol introduces a robust staking mechanism to incentivize long-term holding:

A dedicated staking pool, allocated 20% of the total $xNPCS tokens, rewards early adopters for their loyalty and support.

This program incentivizes long-term holding while recognizing early contributors and fostering a strong, committed community.

Participants can stake their tokens to earn rewards, which are distributed based on both the amount staked and the duration of their commitment.

Staking pools (tiers)	Bronze	Silver	Gold	Platinum
Duration of staking pool, days	30d	60d	90d	180d
APR level, percentage	9%	11%	15%	20%
Minimum sum for participation, in token equivalent	$1000	$2500	$2500	$2500

Staking Boosts:
For example: stakers of 10X from the minimum sum of staking get +2% APR rewards,
stakers of 20X from the minimum sum of staking get +3% APR rewards,
stakers of 50X from the minimum sum of staking get +5% APR rewards;

As a form of additional rewards for holders of NFT collection and or holders of NPCS token:

Holders of NPCS's NFTs may receive a certain % boost when they join staking in the form of a fixed number of percentage boost for each tier or a differentiated value of each corresponding staking tier:
For example: +1% for Bronze, + 2% for Silver, +3% for Gold, +5% for Platinum.

CRYP2NOVA

Archived copy · cryp2nova.com

Airdrop

xNPCS AI Agent Protocol introduces an exclusive Airdrop program, offering NPCS's NFT holders a unique chance to claim a portion of 6.9% of the token supply.

Unlock additional rewards with our tiered Airdrop system, designed to reward loyalty and commitment within the NPCS community!

Be part of the exclusive group of NFT holders from the NPCS collection and qualify for this extraordinary airdrop.

Airdrop Eligibility:

- NFT holders of the NPCS collection are eligible for the Airdrop.
- The snapshot will take place in the coming months.
- Only wallets that have not sold or listed their NFTs during this time period will qualify for the snapshot.
- New buyers who purchase NFTs between now and the snapshot, and do not sell or list them, will also qualify.
- NPCS NFT holders will receive xNPCS airdrops every six months, provided they continue to hold their NFTs.

Here is how it works:

Tiered Rewards: The airdrop is structured into four exciting tiers based on the number of NFTs you hold:

- Tier 1: 0-10 NFTs
- Tier 2: 11-25 NFTs
- Tier 3: 26-50 NFTs
- Tier 4: 51+ NFTs

Each tier unlocks a different amount of tokens, with higher tiers receiving more rewards in $xNPCS tokens.

Cliff and vesting periods:
To ensure a smooth market experience, the airdrop tokens will be released over a six-month vesting period.

This means you'll receive your tokens gradually, preventing any sudden market fluctuations. Plus, there's a one-month cliff from TGE to get you started.

Listing

Following the conclusion of the presale, the xNPCS AI Agent is poised to make its debut, marking a significant milestone in the project's journey.

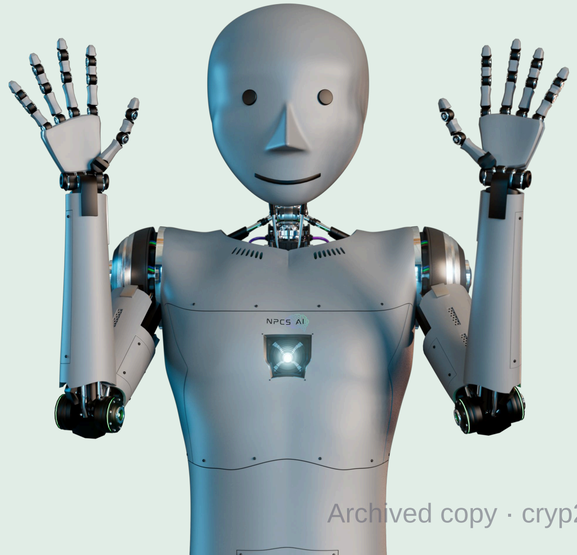

To ensure broad accessibility, $xNPCS tokens will initially be listed on decentralized exchanges (DEXs), providing immediate trading opportunities for token holders.

In parallel, the project is actively pursuing listings on centralized exchanges (CEXs) as a crucial component of its strategic expansion.

We are currently in talks with tier 1 exchanges to ensure a seamless listing process that maximizes visibility and accessibility for $xNPCS holders, and detailed updates will be provided once agreements are officially secured.

This strategic dual-listing initiative is designed to establish a well-balanced trading ecosystem, accommodating both seasoned investors and newcomers while promoting strong liquidity and smooth integration within the wider cryptocurrency landscape.

More updates will be shared as we continue making progress.

Roadmap

1

Phase 1

- AI agent development completion
- Tier 2 exchange(s)
- Tier 1 exchange(s)
- $NPCS (meme) buy backs
- XNPCS major marketing campaign begins
- On board respected Market Maker
- Roll out the AI agent to community
- Airdrops for NPCS NFT holders

2

Phase 2

- Staking Platform goes live
- Staking Dashboard added to website
- Global marketing push. Billboards in Times Square, Japan, China, Hong Kong, Dubai
- Onboard partnerships with key players within the AI/AI AGENT sector
- Venture into major sponsorship deals

Technology and Security

Our smart contracts are developed to optimize both security and scalability, ensuring seamless operations across various functionalities:

Token Sale Contract

Implements secure transfers and efficient token distribution, ensures efficient fundraising and token management on Solana.

Staking Contract

Guarantees fair reward distribution, safeguarding against potential exploitation by ensuring that rewards are proportionally allocated.

LLM technology

The xNPCS AI Agent protocol utilizes a sophisticated Large Language Model (LLM) framework, similar to OpenAI's GPT, trained on extensive datasets. This enables real-time insights into cryptocurrency markets and technologies. At its core is the $xNPCS token, which facilitates interactions with advanced trading tools, staking, and rewards. By integrating LLM technology with blockchain and the $xNPCS token, the protocol ensures current and relevant market information, driving innovation and growth within the platform.

Archived copy · cryp2nova.com

DAO / Governance

Our project is rooted in a community-driven approach, with ongoing exploration of integrating elements of a Decentralized Autonomous Organization (DAO) framework.

Holders of $xNPCS will gain voting rights on key decisions, contributing to a governance system that prioritizes broad participation and openness.

Watch for additional information and updates as we move forward.

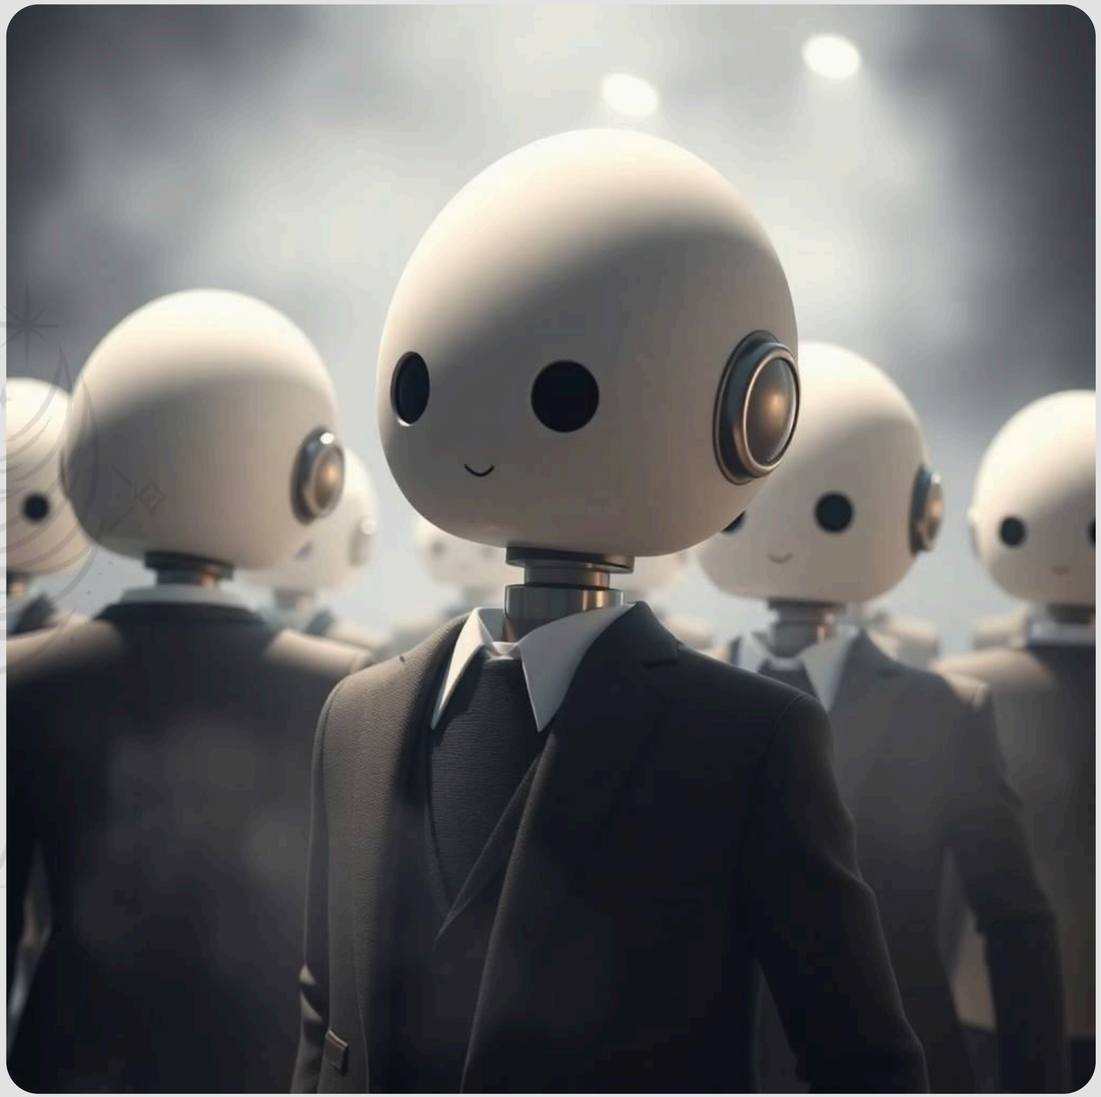

CRYP2NOVA

Archived copy · cryp2nova.com

Environmental Impact

As a project built on the proof-of-stake (PoS) consensus mechanism, $xNPCS minimizes its environmental footprint adhering to eco-friendly blockchain standards.

The $xNPCS token is crafted to foster engagement, innovation, and active participation in the community.

CRYP2NOV

Archived copy · cryp2nova.com

Team / Conclusion

Our team is composed of experienced developers and leading professionals in the cryptocurrency space.

We are deeply committed to fostering the fusion of strong communities and cutting-edge technology, as we believe this synergy is at the core of what makes cryptocurrency truly remarkable.

By engaging with the xNPCS project, users will not only be able to have access to innovative AI technology, consistent outcomes through advanced trading, and a fun experience within a dynamic community but also participate in important decisions that drive platform development.

We invite everyone to be part of our mission as we push creative boundaries, explore new frontiers, and redefine possibilities in the crypto space.

Your involvement could help pave the way for groundbreaking advancements in technology and governance, setting the stage for an exciting journey ahead!

FAQ

What is TGE (Token Generation Event)?

A Token Generation Event (TGE) is the process where a blockchain project creates and distributes its native tokens to the public for the first time.
This event marks the official launch of the tokens, which are typically designed for specific use cases within the project's ecosystem, such as utility or governance.

What is Lock-up (Cliff)?

A lock-up, or cliff, is a mechanism designed to control the release of tokens over time. It ensures tokens are not released all at once, stabilizing prices and encouraging long-term commitment from token holders.

What is Vesting?

Vesting in crypto refers to the systematic release of tokens over a predetermined schedule. This process ensures that tokens are not made available all at once, aligning the interests of stakeholders with the project's long-term goals and preventing sudden market fluctuations.

What is APR?

Annual Percentage Rate (APR) is the annualized interest rate commonly used for staking, borrowing, or lending on crypto platforms.

What is DAO?

A DAO is a community-driven organization that leverages blockchain technology to facilitate decentralized governance and coordination. It empowers members to contribute to decision-making processes through token ownership, ensuring that all actions are transparent and recorded on the blockchain.

Can I stake my $NPCS for $xNPCS?

Yes, NPCS holders can stake their NPCS to earn xNPCS.

How can I participate in the xNPCS ecosystem?

Participation is simple! You can:
Join the presale to grab some $xNPCS tokens early
Stake $xNPCS tokens for staking rewards
Take advantage of the referral program to earn additional benefits by inviting others to join.

Where can I get $xNPCS tokens?

$xNPCS tokens will be accessible during the presale on the official platform and will later be listed on both decentralized and centralized exchanges after launch.
