❓What is NX Finance

NX Finance in one sentence

NX Finance is the yield layer in Solana which provides yield leveraging and point farming strategies.

Introduction

As a pioneering composable yield layer, NX Finance empowers every user to reap returns from premium interest-bearing assets and points farming campaigns within the Solana ecosystem.

Positioned as a central innovator in Solana DeFi ecosystem, NX Finance addresses a crucial market pain point: the lack of adaptable financial products that can effectively stratify the inherent yield of high-uncertainty return assets to redistribute risks, thereby catering to users with diverse investment risk preferences.
