🪄 About Particles Money

Copy

Introduction

Particles Money is an enhanced fork of the successful DeFi project Fantasm.finance, we aim at developing and popularizing synthetic tokens for multiple Ecosystems & multiple synthetic tokens.

With **Particle Money** we introduce a decentralized solution by adopting a partial collateralized design, where Particle's synthetic tokens are partially backed by a **token** and partially by our native token.

Disclaimer: This protocol is an exploratory venture in the degen space. We encourage all prospective participants to conduct thorough research (DYOR) and make informed decisions with their investments
