According to the World Bank, over 2 billion people worldwide are unbanked and most of them come from developing countries because of inability to opening and maintaining bank accounts. With the benefits of blockchain technology, crypto charity brings people in emerging countries access to the economic system with zero fees. Also, crypto charity can helps distribute money to people in need on emerging markets, sparks economic process and creates local crypto economies.

Charity may be a way for crypto to put in itself within emerging markets, where people are more likely to be receptive to

the assistance being offered. And while it might be supposed that folks within the developing world won't be within the best position to find out a few new sorts of money like cryptocurrency. One of the most reasons why recipients are hospitable crypto donations is that they appreciate one among crypto's main strengths and that's the power to sidestep middlemen and to supply transparency transactions.

Charity is the main program of Peace Token, charity works that may surely help those in need online and offline to make widespread adoption, since 2019 we're already doing this type of service and that we have helped many individuals.
