Architecture

Built for the Future of Web3

Enterprise-grade blockchain infrastructure powered by innovative technology and designed for real-world applications at global scale.

Lightning Fast

15s Block Time

Ultra-fast block confirmation for instant transactions

Massive Scale

1000+ TPS

High-throughput processing for enterprise applications

Fair Mining

Phihash Algorithm

GPU-optimized, ASIC-resistant mining for true decentralization

Sustainable Model

2% Annual Inflation

Balanced tokenomics ensuring long-term network security

Maximum Capacity

4 MB Blocks

Large block sizes supporting complex smart contracts

♾️

Future-Proof

Infinite Supply

Designed for sustainable long-term ecosystem growth

Ecosystem

Complete Blockchain Infrastructure

Everything you need to build, mine, trade, and scale on the Phicoin network. From mining pools to DeFi bridges, we provide the full stack for Web3 innovation.

⛏️

Phihash Mining

Revolutionary GPU-optimized algorithm ensuring fair distribution, ASIC resistance, and sustainable decentralization for all network participants.

Start Mining→

🌉

Solana Bridge

Seamlessly bridge assets between Phicoin mainnet and Solana ecosystem for DeFi applications, trading, and cross-chain liquidity.

Use Bridge→

💼

Web Wallet

Secure, intuitive wallet interface for managing your Phicoin assets with advanced features, multi-signature support, and DeFi integration.

Open Wallet→

🔍

Block Explorer

Real-time blockchain explorer providing comprehensive transaction history, network statistics, mining analytics, and smart contract interaction.

Explore Network→

🛰️

Mining Pool

Archived copy · cryp2nova.com

Mining pool for the Phicoin network with enhanced analytics and tooling.

Mining Pool→

Phi-Solana Explorer

View the wrapped PHI token on Solana and monitor cross-chain activity via Solscan.

View on Solscan→

Apply Blockchain to Your Most Challenging Use Cases

Easily deploy advanced blockchain infrastructure with enterprise-grade solutions that harness the power of decentralized mining, high-performance transactions, and seamless DeFi integration.

Fair Mining Revolution

Phicoin's revolutionary **Phihash algorithm** resists ASIC/FPGA devices and leverages FP32 computations to ensure everyone can mine fairly using consumer-grade GPUs. Join the democratized mining revolution with sustainable economics.

Lightning-Fast Performance

Experience breakthrough performance with **15-second block times** and over **1,000 TPS**throughput, delivering smooth operations for modern DeFi applications without compromising decentralization or security guarantees.

Enterprise-Grade Infrastructure

Archived copy · cryp2nova.com

Built for scale with **enterprise reliability** and **continuous innovation**. Phicoin's architecture aligns mining requirements with hardware evolution, ensuring future-proof scalability for the Web3 ecosystem.
