Welcome to Printr

Printr is the first **chain-abstracted** token launchpad where anyone (including AI agents) can **launch**, **trade,** and **stake tokens** across **12+ blockchains.**

What makes Printr different?

- **Built for Every Chain** - Launch on any chain. Trade cross-chain in one click.
- **Custom Fees** - Set your own custom fee structure per launch.
- **New fee distribution options** - Creator keep fees, route to stakers, buyback and burn, compounding liquidity, or no custom fees at all.
- **Staking** - For creators to reward core contributors to their token.
- **Bonding curve customization** - Set your own starting market cap, graduation market cap, token supply, and liquidity-to-mcap ratio. No more one-size-fits-all.
- **Anti-Vamp Protection** - Tickers lock at 100k daily volume
- **Dev & AI friendly** - White label API solutions & custom MCP servers to allow developers & AI agents to build on top of Printr.
