Introduction

Copy

PumpBTC serves as a Liquid Staking Solution for Babylon. Its mission is to bring DeFi into the Bitcoin ecosystem, driven by an ecosystem-centric approach and supported by seasoned DeFi experts and industry-leading partners.

By abstracting complexities, PumpBTC facilitates effortless collaboration between users and Babylon. Users can stake into Babylon with a single action through PumpBTC, immediately receiving liquidity tokens without waiting periods.

Inspired by the "pump" meme culture in the Bitcoin community, PumpBTC aims to help BTC holders maximize yields through Babylon's liquid staking - essentially rebuilding WBTC/BTCB with native yield.
