QANplatform White Paper

We have removed the obsolete white paper from our resources due to its obsolescence and the confusion it has caused. This decision aligns with our ongoing efforts to ensure clarity and accuracy in our documentation.

In anticipation of the upcoming QAN MainNet launch in 2025, we are working on a new, updated white paper that will reflect the current state of the project. This new document will provide a comprehensive overview of our latest developments and strategies.

We appreciate your patience and look forward to sharing the new white paper with you soon. Thank you for your continued support.
