Welcome

River is building a chain-abstraction stablecoin system that enables cross-chain collateral, yield, and liquidity—all without bridging.

Powered by the omni-CDP stablecoin satUSD, users can earn, leverage, and scale across different ecosystems natively.

River features the first omni-CDP module that allows users to collateralize assets on Chain A and mint stablecoin satUSD on Chain B—without bridging the assets.

CRYP2NOVA

Core Modules

Omni-CDP

The first cross-chain CDP system built on LayerZero's OFT standard, enabling users to collateralize BTC, ETH, BNB, or LSTs on a source chain and mint satUSD natively on a destination chain—no bridges or wrappers required.

- Deposit BTC, ETH, BNB, or LST as collateral and mint satUSD
- Swap USDT/USDC/USD1 for satUSD at 1:1 ratios

Mint/Swap to get satUSD : https://app.river.inc/mint ↗

Yield

Stake satUSD to receive satUSD+, a yield-bearing token that shares protocol revenue.

River launches smart vaults where institutions and retail deposit BTC or ETH to earn real yield from DeFi strategies and protocol revenue, with no liquidation risk and flexible returns.

Stake satUSD : https://app.river.inc/staking ↗

River4FUN

A contribution layer where users stake tokens, connect their X account, and earn River Pts by posting, referring, and voting—turning social engagement into on-chain rewards and governance activity.

- Connect X to earn initial airdrop
- Stake any token to accumulate River Pts
- Vote for your fav and earn campaign reward

Join River4FUN : https://app.river.inc/fun ↗

Smart Vault

A yield product where you deposit assets like USDT, BTC, or ETH and earn returns without liquidation risk.

Smart Vault deploys your funds across DeFi and institutional-grade CeDeFi strategies, while also minting satUSD and deposit it into the staking pool to earn staking rewards.

Access yield with one-click : https://app.river.inc/smart-vault ↗

Prime Vault

Prime Vault is River's institutional-grade product built for maximum security, predictable yield, and operational simplicity.

It integrates directly with leading custodians and listed company partners, ensuring assets remain under regulated custody while earning yield through River's stablecoin yield system.

Institutional access : https://app.river.inc/prime-vault↗

What You Can Do

1. Mint satUSD

Use BTC, ETH, BNB, or LSTs as collateral to mint satUSD with zero interest.

2. Stake for Yield

Stake satUSD to earn satUSD+, a liquid token that shares protocol revenue.

3. Engage to earn

Join River4FUN by connecting your X (Twitter) account. Create or share content to earn River Pts.

Stake any token to earn River Pts daily.

4. Use satUSD across ecosystem

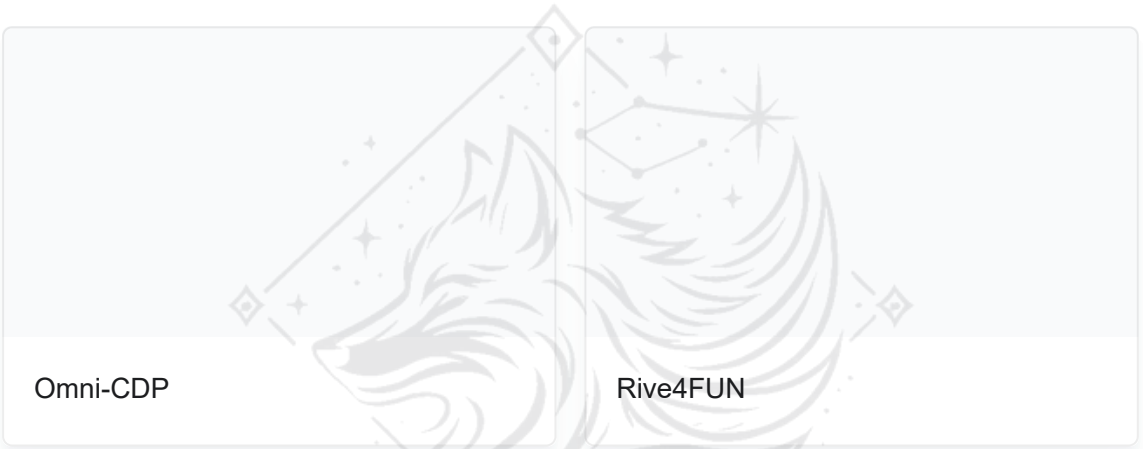

Use satUSD across Pendle, PancakeSwap, Segment, LayerBank and more to unlock 5 – 25× multiplier River Pts rewards.
