Non-Custodial Architecture
Non-Custodial Architecture

Private keys are generated and stored exclusively on the user's device. No server-side key storage or transmission.

AES-256 Encryption
AES-256 Encryption

All sensitive data including seed phrases and private keys are encrypted with AES-256 on the device.

Biometric Auth
Biometric Auth

Fingerprint and Face ID authentication for transaction signing and wallet access on supported devices.

Secure Enclave
Secure Enclave

Hardware-backed key storage utilizing the device's secure enclave or trusted execution environment (TEE).

SSL/TLS Pinning
SSL/TLS Pinning

Certificate pinning prevents man-in-the-middle attacks. All API communications use TLS 1.3 encryption.

CertiK Audit (Planned)
CertiK Audit (Planned)

Comprehensive security audit by CertiK scheduled for Q2 2026 covering smart contracts and platform infrastructure.
