About Sentism

Welcome to SentismAI, where we're cooking a real DeFAI protocol!

SentismAI ushers in a new era of on-chain applications — from autonomous AI-driven investing to intelligent DeFi workflows and real-world asset management.

Built on BNB Chain and integrated across EVM ecosystems, Sentism enables users and protocols to automate trading, manage risk, optimize yield, and govern DAOs through fully autonomous agents.

Our Mission

To make autonomous finance accessible to everyone - **creators, institutional users, investor**s by building AI-native tools that unlock secure, seamless, and scalable interaction with Web3 protocols.

CRYP2NOVA

Core Capabilities:

- **Autonomous Execution** – AI agents manage lending, farming, bridging, and trading autonomously
- **AI-Powered Investment Analysis** — Agents scan chains for yield, farming, and alpha
- **Real-Time Risk Intelligence** – Simulation and scoring engines detect volatility, exploit risk, and yield shifts
- **Democratized Finance** — Anyone can launch or access agents for DeFi tasks
