Whitepaper v1.0

StakePoint

The All-in-One DeFi Platform on Solana

A comprehensive decentralized finance ecosystem combining token staking, optimized swaps, secure token lockers, and a full Solana toolkit.

Contents

Archived copy · cryp2nova.com

Introduction

StakePoint is a comprehensive decentralized finance (DeFi) platform built on Solana, designed to provide users with a unified ecosystem for earning passive income, managing tokens, and securing liquidity. By combining token staking, optimized token swaps, secure locking mechanisms, and a full wallet toolkit, StakePoint eliminates the need for users to navigate multiple protocols.

Our mission is to democratize access to DeFi yields while maintaining the highest standards of security and user experience. Whether you're a first-time DeFi user or an experienced builder, StakePoint provides the tools you need to maximize your returns on Solana.

Focus

The Problem

The current DeFi landscape presents several challenges for users seeking to maximize their yields:

Archived copy · cryp2nova.com

Fragmented Ecosystem

Users must navigate multiple protocols for staking, swapping, and locking, leading to a confusing and inefficient experience.

High Barriers to Entry

Many platforms require minimum deposits, complex setup processes, or technical knowledge that excludes casual users.

Limited Flexibility

Most staking platforms lock funds for extended periods without options for early withdrawal or flexible terms.

Lack of Transparency

Opaque reward calculations and hidden fees make it difficult for users to understand their true returns.

Security Concerns

The proliferation of unaudited protocols and rug pulls has eroded trust in DeFi platforms.

Our Solution

StakePoint addresses these challenges by providing an all-in-one DeFi platform that combines the most essential yield-generating tools in a single, user-friendly interface:

Unified Platform

Access staking, swaps, lockers, and tools from one dashboard without switching between protocols.

No Minimums

Start earning with any amount. No minimum deposit requirements for any of our products.

Archived copy · cryp2nova.com

Flexible Options

Choose between locked pools for higher yields or unlocked pools for maximum flexibility.

Full Transparency

Real-time reward tracking, clear fee structures, and on-chain verification of all transactions.

Core Features

Token Staking

Earn passive income on your SPL tokens

Our multi-pool staking system allows users to stake any supported SPL token and earn rewards. Key features include:

- •**Reflection Rewards:** Earn additional tokens through our reflection distribution system
- •**Flexible & Locked Pools:** Choose your preferred lock period for optimized yields
- •**Real-Time Tracking:** Monitor your rewards accumulate in real-time
- •**Instant Claims:** Withdraw your rewards at any time without waiting periods

CRYP2NOVA

Jupiter-Powered Swaps

Optimal routing across Solana DEXs

Integrated with Jupiter aggregator to provide the best swap rates across all major Solana DEXs:

- •**Best Rates:** Automatic route optimization for minimal slippage
- •**Trader Leaderboard:** Gamified trading with rankings and performance tracking
- •**Low-Liquidity Support:** Raydium fallback for tokens not on Jupiter

Token & LP Lockers

Secure vesting and liquidity locks

Archived copy · cryp2nova.com

Enterprise-grade locking solutions for projects and teams. Use our Solana token locker to lock team tokens, dev wallets, or LP tokens on Solana with on-chain verification.

- •**Team Token Locks:** Lock team allocations and dev wallets with a fixed unlock date
- •**Liquidity Locks:** Build investor trust with locked LP tokens from Raydium, Meteora, Orca, and PumpSwap
- •**On-Chain Verification:** All locks are publicly verifiable on Solscan

Whale Club

Exclusive tier for high-value holders

Premium membership tier for dedicated community members:

- •**Protocol Input:** Direct influence on platform development and features
- •**Exclusive Access:** Early access to new features and pools
- •**Community Recognition:** Leaderboard visibility and special badges

Solana DeFi Toolkit

Free utilities for managing your Solana wallet

A full suite of free tools for token holders and project teams:

- •**Token Burn:** Permanently burn SPL and Token-2022 tokens to reduce circulating supply
- •**Airdrop Tool:** Send tokens to multiple wallets in batches via CSV upload
- •**Wallet Cleanup:** Burn dust tokens and close empty accounts to reclaim SOL rent
- •**Wallet Analyzer:** Portfolio breakdown, PnL tracking, and wallet insights
- •**Holder Snapshot:** Export a full list of token holders with balances
- •**Token Safety:** Free security scan for any SPL token
- •**Sniper Bot:** Telegram bot for sniping new token launches

Architecture & Security

StakePoint is built on a robust technical foundation prioritizing security, scalability, and user experience:

Smart Contracts

Archived copy · cryp2nova.com

- • Built with Anchor framework on Solana
- • Program ID verified on-chain
- • Upgrade authority secured by Squads multisig (3-of-4)
- • Comprehensive error handling

Frontend

- • Next.js with TypeScript
- • Solana Web3.js integration
- • Real-time blockchain data
- • Mobile-responsive design

Security Measures

- • Audited by Auditr (Grade A, zero high-severity issues)
- • Squads 3-of-4 multisig on upgrade authority
- • Non-custodial: all funds in PDAs, no private keys
- • Emergency pause functionality

Infrastructure

- • Deployed on Vercel Edge Network
- • Supabase for off-chain data
- • Multiple RPC providers
- • 99.9% uptime target

Program ID: `gLHaGJsZ6G7AXZxoDL9EsSWkRbKAWhFHi73gVfNXuzK`

Audit: Grade A by Auditr — View full audit report

Tokenomics

StakePoint generates revenue through fees across the platform. A portion of all platform fees is used to buy back SPT tokens from the open market, creating consistent buy pressure and reducing circulating supply over time.

Platform Revenue

Staking Fees

Small fee on staking deposits and reward claims

Archived copy · cryp2nova.com

Swap Fees

Percentage of swap volume through our interface

Locker Fees

One-time fee for creating token and LP locks

For full token details, allocation breakdown, and live buyback history, visit the SPT token page.

Roadmap
