Whitepaper

1. Genesis of the project

There is no doubt, StarTerra has been created by and for the community. At the same time, the foundation of StarTerra is an extraordinary story that seems like it came out of a movie! Wojciech Gruszka (@PanParagraf) and Kamil Jarzombek (@jarzoombek), the two major tokenomics experts in Poland and early adopters of Terra Blockchain, posted a series of tweets and YouTube videos regarding Terra and its benefits! They were amazed by the influx of Polish users following their lead to Terra, making it one of the top communities on the official Terra discord channel! This led to the expansion of their networking contacts within most prominent Terra community members and to the foundation of an idea that would become StarTerra.

After discussing the concept within the network, some major elite members insisted that Wojciech reach out to Do Kwon (@stablekwon) - the Founder and CEO of TerraLabs and the Terra Blockchain. So on April 13th, 2021, Wojciech took the leap and sent a direct Twitter message to Do Kwon explaining the project. Almost immediately, Do Kwon replied back to the idea:

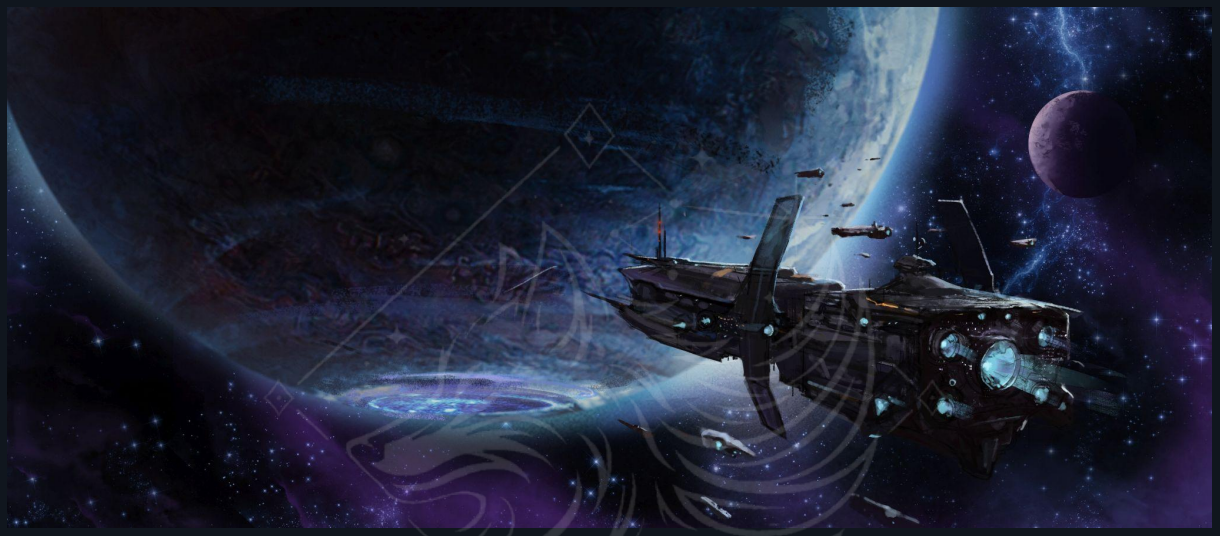

"This Is exactly what i've been looking for... Do you need me to source you the Devs?"- Do Kwon CEO of Terraform Labs and the Terra Blockchain Apr 13, 2021

Just like that, with Do Kwon's blessing, the project shifted overnight from a concept to a project in full scale development! Thanks to the amazingly engaged Terra community, we managed to complete the full time team of world-class developers within only a few weeks. Having onboard such amazing experts like Tomasz Kowalczyk (@tomkowalczyk) - the most reputable smart-contracts developer in Poland or Maciej Miłkowski (@maciejmilkowski) - the CEO of his own UX/UI team (https://imtu.pl/) with extremely gifted graphic designers lead StarTerra to the path of extremely incredible development.

Archived copy · cryp2nova.com

Since we are building on Terra - the most innovative blockchain - our goal was to provide our users with a unique experience. We predicted gamified projects will become a significant trend one day and at the same time, most of the Terra community is highly engaged StarCraft players. This led to the idea of creating a gamified launchpad with play2earn model and gamified NFT integration.

Welcome to StarTerra - the first gamified IDO platform on Terra

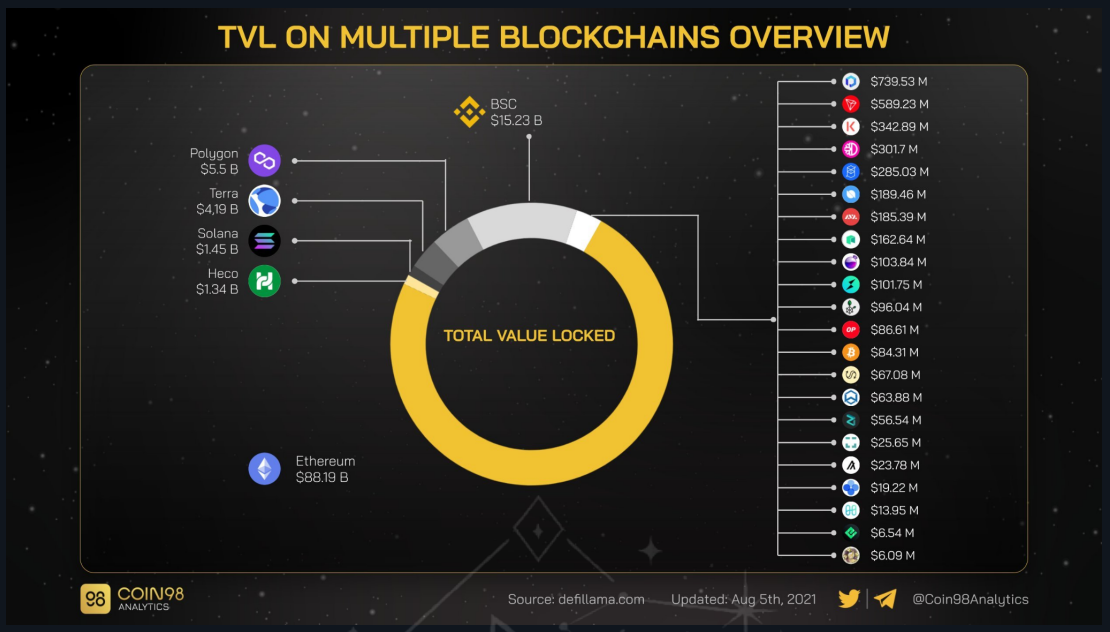

2. Why are we building on Terra?

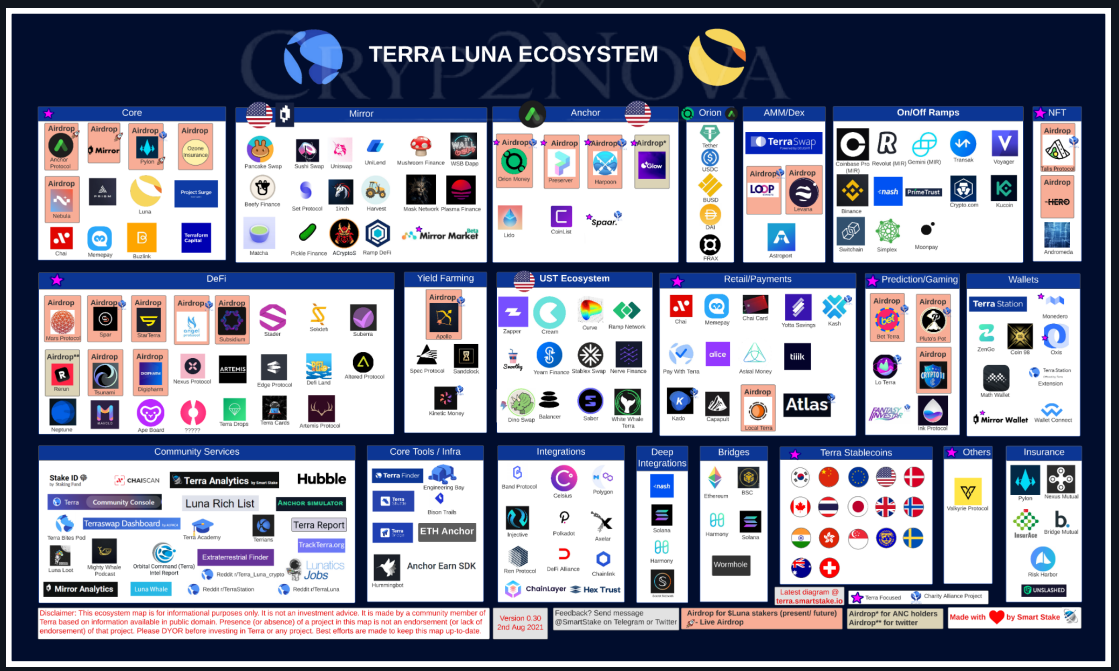

What makes Terra Ecosystem special, aside from the incredible community and open-minded approach from Terra Form Labs executives, is the quality and uniqueness of the operating projects. This is not a chain where almost every single day simple copies of Ethereum based projects are rising, no it's more than that! Synthetic assets with ultra low gas fees and farming strategies!?! Stable 20% yield on stablecoin deposits, even during bearish market conditions!?! Welcome to Terra!

The combination of unique utility and low gas fees of Mirror, Anchor or Pylon Protocols lead Terra to the top4 chains in terms of total value locked with over 4B$ TVL being captured.

Archived copy · cryp2nova.com

This led us to the obvious conclusion: if Terra made it to the top4 with only 4 protocols being live, then with over 40 other projects waiting in the pipeline, we can expect a tremendous inflow of capital. When we take into account the fact that Terra.js library written in JavaScript download statistics are rising exponentially as well as the 150M$ community fund is available for the most talented developers, then there is no doubt there are many other projects to launch in the near future.

Archived copy · cryp2nova.com

Most of these projects to get initial funding and marketing exposure will seek professional services of the IDO platform, and here where StarTerra is. By hiring our in-house tokenomics, marketing and audit experts, we are able to provide them with comprehensive support and boost their development.

3. StarTerra Universe - feel like in the real game

One of our major goals while developing our platform is to create on StarTerra a unique feeling of the real computer game. In order to pursue this goal, we've created our own StarTerra Universe with our own story line and amazing references to the Terra ecosystem. Each of the gamified factions has its own unique story based in the StarTerra Universe, that will evolve over time with the help of our scriptwriters, graphic designers and most importantly YOU, the players! That's right, YOU have a major role in the development of the universe because as Factions battle over projects IDOs begins, your participation will play a major role in wins and loses for an allocation pool. As the project IDOs are completed, our scriptwriters and graphics designers will develop a history that will expand over time!

Archived copy · cryp2nova.com

The whole story will be visualized in the series of Medium articles, with a professional cinematic trailer on top of that. The whole trailer is designed in 2.5D technology with our in-house story-line and artwork. We believe this will be something you have never seen before in the whole crypto space.

4. "Factions" - our gamified tier based system

One of the greatest problems of launchpad platforms is a significant lack of demand for their native tokens. By researching the market, we've identified that the root of the above mentioned problem is that fixed entry amounts are prescribed for the individual tiers, so users have no incentive to acquire more native tokens. This in turn makes investors have no incentive to buy more IDO tokens. All they need to do is just to stake a fixed amount of a given native token and then wait for allocations to purchase IDO tokens.

This is why we've decided to gamify the way of carrying out IDOs...

Instead of introducing fixed entry amounts to the given tier like the other launchpads do, we've created a special gamified system of competition

Archived copy · cryp2nova.com

between tiers, allowing their members to stake more of our $STT native token than the minimum required amount.

At the genesis, each gamified tier is entitled to **15%** of available allocation to purchase. However, on the basis of specially defined competition rules, such as the total number of staked $STT tokens or level and quality of social media engagement these % are subject to change.

Let's explain it with an example:

You are the player willing to participate in one of our IDOs. You need to connect your wallet, choose your unique nickname & avatar, and join 1 of 3 tiered factions of your choosing.

You decide to join #Lunatics over #Degens and #Interstellars

Each faction **starts with a 15% allocation pool weight**, and battles over the remaining 20%.

After the end of the allocation event, it turned out that #Lunatics was the most powerful faction and the total amount of their staked $STT and their social engagement was greater than #Degens and #Interstellars. This led to the change in the pool weight distribution structure:

*#Lunatics receive **25%** pool weight*

*#Degens receive **21%** pool weight*

*#Interstellars receive **19%** pool weight*

Afterwards, the allocation's distribution within every faction is divided into two equal parts:

50% is guaranteed

50% is lottery based

Archived copy · cryp2nova.com

Guaranteed pool:

Every faction member will participate evenly in the 50% guaranteed allocation pool. This type of constructed allocation system builds a sense of community and collective effort among the members of a given faction. One of our main goals is to stimulate the process of building faction identities of our token holders, creating rivalry and competition which in turn leads to higher social awareness and engagement of every project using our Launchpad platform. Each faction has its own unique history, developed by you - the player, integrated into the Starterra Universe. Moreover, StarTerra is cooperating with the most reputable community members who, as the elected faction leaders, will recruit players to join their faction.

Lottery base pool:

In order to gamify and reward faction members who have contributed more $STT tokens and for a longer time which in turn helped their faction achieve greater success, we've created a special gamified leaderboard!

Activity of the players will be measured by a special unit - StarTerra Energy which is going to affect their chance of winning lottery-based allocation over the less committed faction members. Since the guaranteed allocation is distributed evenly amongst all members of a faction, the lottery based pool will hold significantly more value as there is a limited number of total allocations. In this way, we intend to introduce competition not only between factions, but also inside each of them!

Archived copy · cryp2nova.com

Two additional Tiers:

We at StarTerra believe that there should also be an attractive offer for the retail users and for the so-called "whales'' This is why we introduced two additional tiers specially designed for them!

In the 'StarTerra' tier, we include players who do not yet meet the minimum $STT requirements to join their favourite faction, but aspire to be a part of the ecosystem! Therefore, the required number of $STT tokens to enter this tier will be greatly reduced. "StarTerra" is a lottery based tier with a limited number of winning tickets, where newcomers who do not yet have large amounts of digital assets can get a head start. Although winning chances are lower than in the other tiers, those who make it and win a lottery ticket will achieve a comparatively significant allocation to purchase.

For our most devoted players with the largest token holdings, "Whalecraft" will be the most exclusive and sought after tier. This is why we allocated 30% of our whole pool weight to this tier. In order to participate in this pool, our players need to become one of the top 30 holders of $STT token. We will provide our stakeholders with the live leaderboard where they will be able to check whether their holdings are sufficient to qualify for the top tier. Through using leaderboard, we also eliminate the likelihood of one very large whale distributing their tokens across multiple wallets. The list of tier participants will be updated before each IDO and though the exact snapshot time will not be publicly revealed, we will provide a limited time frame "reasonably" before.

Archived copy · cryp2nova.com

By providing a time frame rather than the exact time of the snapshot, we increase HODLing pressure while giving players a fair zone in which they must accumulate tokens in order to become a whale and have guaranteed allocations in their favourite IDO's. This provides great gamified competition between top wallets as allocation in this tier will be really lucrative as allocations in Whalecraft will be 100% guaranteed.

In addition to the 100% guaranteed allocation top whales will take part in our Top Secret rewards system, as well as earning UST based on our Play2Earn model which is going to be explained in the next chapter.

5. Gamified NFT and Play2Earn

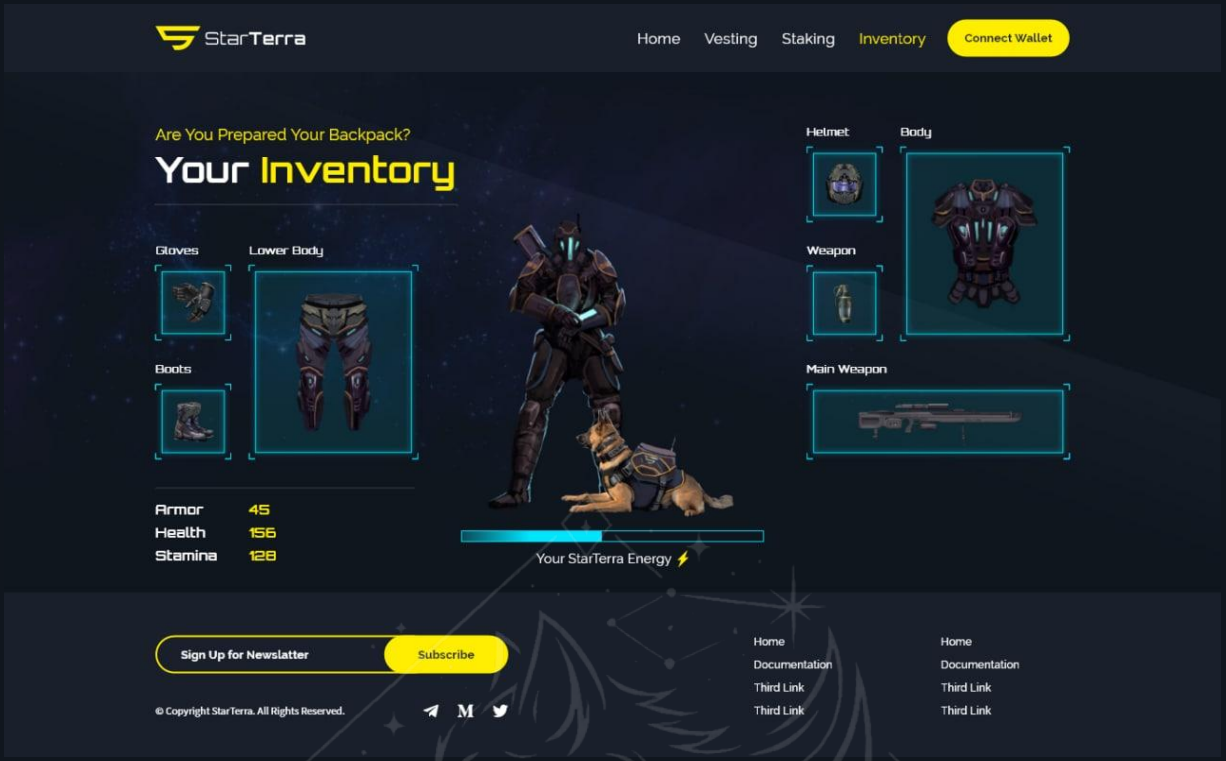

We are introducing the most exciting feature that has never been done before in the Launchpad space, It's a Play2Earn feature with gamified NFTs integration! Top leaderboard players from each faction and all Whalecraft members will earn $UST stablecoin for their active participation in IDO. That's right, by participating in an IDO players will not only gain allocation to purchase IDO tokens of the top quality projects but also earn a payout in $UST - the best decentralized stablecoin in the whole crypto space,

This $UST payout will be funded from 3 sources:

- 25% of Anchor Yield generated from pre-funded deposits
- 20% of income from transaction fees
- 50% from the Sales of our limited NFTs collections

In a boost to gamification we will launch limited NFT's collections that not only feature our beautiful graphics designed in house, but have a utility as well. These NFTs will come in the form of skins for your avatar that include Weapons, Armour, Creatures and more. With these special NFTs you'll be able to boost your leaderboard scoring and in effect obtain higher allocation, access into the Whalecraft, play2earn payout and some other surprises we have in store!

Archived copy · cryp2nova.com

initial flow from the NFT integration

These Limited Edition will not only make users stand out but will ultimately get them allocations to purchase the projects they want the most. There will be 4 types of NFTs in each collection able to be purchased by whitelisters: Common, Rare, UltraRare as well as 1 legendary NFT that will be sold in an auction.

50% of the revenue generated from these NFTs will go to the play2earn fund. Until StarTerra Launchpad's NFT version is released, we will be adding our Warchest (The money generated from Strategic rounds and Public Sale) into Anchor Protocol to generate a yield as to use 100% of that yield to support the Play2Earn Model).

6. UST stablecoin deposits

We are going to implement a pre-funding contribution system. Based on our research of the negative user experience of some other IDO platforms (i.e. short period of time for sending contribution after receiving allocation

Archived copy · cryp2nova.com

results) our users will be required to prefund their deposits with $UST (Terra USD stablecoin) before entering to the given IDO. This will be automatically deducted from their balance when the allocation is granted. This system provides our investors with peace of mind that their allocation will not be forfeited.

What's even more exciting, thanks to the Anchor Protocol bridge we will be able to generate a 20% stable yield on those deposits. **This is something no other launchpad offers.** We want to use this yield in a way that supports our gamified competition, tokenomics and investors at the same time. This is why the 20% yield generated on stable coins deposits will be split on 3 parts:

- 10% will be distributed directly to depositors;

- 5% will be distributed amongst top leaderboard contributors via Play2Earn

- 5% will be used for the $STT burning mechanism.

In this way we make StarTerra not only a safe place to earn stable yield on deposits but also support our deflationary tokenomics. We cannot forget either about top leaderboard contributors. Thanks to this mechanism, they will be incentivized not only by additional lottery tickets, but also by bonus payouts in stablecoins.

Archived copy · cryp2nova.com

8. "Multi-Planetary Farming" - our unique multi-asset staking mechanism

We are extremely honored to present you one of the most unique features of StarTerra – the Multi-Planetary Farming. For the purpose of this feature we give the option to convert a portion of our success fee into 1% to 3% tokens of every project taking part in our IDO. Our plan is to create a special feature which allows $STT stakers to receive weekly airdrops in exchange for certain beneficial actions.

$STT stakers will receive a unique possibility to receive token incentives from the other IDO projects within 6 months from their launch on StarTerra. Imagine that, as an $STT staker you can claim dozens of different tokens from previous IDOs, where their demand and price may be too great to obtain any other way. This creates compounding in the form of an investment combine harvester. The inflation of given tokens will be distributed weekly over a period of 6 months, and the final amount of reward will depend on the number of $STT you are staking. This will be a very similar model to $LUNA staking rewards which at the moment consists of weekly $ANC and $MIR airdrops.

We believe multi-planetary farming might also be a feature that will help to minimise the pump & dump effect of projects taking part in our IDOs. This is because it is an excellent marketing tool which requires a weekly visit to the projects page where Stakers will get all of the updated content, social media and important links for the project. $STT stakers in order to receive airdrops will have to claim them on the weekly basis. However, these won't be just typical click-to-claim airdrops or ones that go straight into a user's wallet. We want to create end-users for each project participating in our Multi-Planetary-Farming!

Before $STT stakers are entitled to claim airdrops (on a the weekly basis), they must perform some beneficial action, and projects are able to prescribe these beneficial actions/requests/conditions *i.e. a staking platform can have our airdrop coded where the users must access the project's staking platform and perform some action to receive tokens.*

This is a revolutionary way where we can continually market a project post IDO and by having the airdrops conditional, even simply as liking a post or

Archived copy · cryp2nova.com

watching a video, we can ensure that a project continues receiving the attention it needs to flourish in the competitive crypto space.

9. StarTerra Council

To provide our users with the best possible due diligence we will invite our most notable advisors and strategic partners to participate in the selection of projects applying for IDO. StarTerra Council members will have the opportunity to not only propose and verify projects to be fundraised but also participate in platform governance and contribute to the growth of our Launchpad and in-development ecosystem. The formation of the StarTerra Council is essential to keep our core members enthusiastic and invested in the future success of the platform, beyond just an advisory or fundraising role. Forming a Council will expand StarTerra's reach into ensuring that top tier projects will land on our launchpad before anywhere else. These Long-term relationships will forge many strategic alliances and benefit not only the projects to be listed on our launchpad, but the native $STT token holders as well!

Archived copy · cryp2nova.com

StarTerra Council

10. Applying for IDO

We strive to create a platform which connects high quality projects with keen community members to explore inventive and forward-thinking upcoming blockchain protocols and technologies on the rapidly evolving Terra network. In order to evoke our vision it is the StarTerra Council's responsibility to act as a governing body carefully handpicking projects to ensure we're at the cutting edge of blockchain technology and innovation. Each application for launch will be reviewed and voted on by the StarTerra Council. If the project is approved by the council, they will be supplied with detailed guidance on how to prepare and carry out a successful launch on the StarTerra launchpad. All projects that pass the initial phase onto the StarTerra Launchpad will receive an advisory on tokenomics. Business development, go-to-market strategy and will receive support in the form of pre-& post-IDO marketing while forging strategic partnerships throughout the entire process.

Selected projects will be eligible for StarTerra Labs Cultivator Program to provide an industry leading full-service incubation package. Projects that qualify for the StarTerra Labs Cultivator will receive pre-funding grants to ignite their growth before IDO. The Cultivator program will utilize our fantastic network of experienced and reputable advisors who will provide professional reinforcement to the project's team aiding with matters such as creating a responsible and sustainable tokenomics model, while

Archived copy · cryp2nova.com

providing expert developer and auditor support. We will also be providing renowned PR and Marketing support focused on developing self-sustaining communities and promoting awareness of Projects. The aim of StarTerra Labs Cultivator is to incubate projects to infinity, where we maintain a working relationship while providing pivotal support leading the project to success.

One of our main goals is to help transfer our players into the IDO projects end-users. This is why interaction with the product of the specific IDO projects is the part of our gamification.

Depending on the IDO projects discretion, we will be changing the leaderboard scoring for what best suits the project. That can range from end-users received during an IDO for a project that has an MVP before token release or sales from an NFT collection or anything a project, and we can come up with. The key aspect to this will be faction tiers where we have Faction leaders that help their Factions members strategize. To encourage people to form an identity around specific factions, we've enlisted the help of some of the Top community members in the crypto space to act as faction leaders. Each of these faction leaders will be responsible for forming strategies and marketing content within Faction specific communities chats, where we'll encourage investors to form rivalries and battle it out for the additional 20% gamified pool. However, in the end it's up to each individual player to follow the guidelines and if they have a strategy of their own, they may implement them and share them with their faction. These rivalries will create engagement beyond the now stale, 'tag 3 friends like and follow' campaigns that have oversaturated Crypto's social media space, and benefit projects with fresh and fun content.

11. Tokenomics

The native digital cryptographically-secured fungible token of the StarTerra platform (ticker symbol $STT) is a transferable representation of attributed governance and utility functions specified in the the StarTerra platform, and which is designed to be used solely as an interoperable utility token on the platform.

Archived copy · cryp2nova.com

When developing $STT tokenomics one of our main goals was to avoid the dump effect which often happens with other IDO tokens when they have downtime in their deal flow. This is why we've decided to put emphasis on the broad system of incentives to hold and utilise $STT tokens. As previously mentioned, $STT stakers may earn $STT rewards and weekly airdrops coming from our multi-asset staking feature, in exchange for their various beneficial contributions/actions. After the successful launch of a given project on our platform 1 to 3% of its total tokens will be set aside in the reward pool to incentivise continuous interactions.

To further increase the demand for our core token, we decided **30% of our transaction fees** will be dedicated to the burning of $STT. Additional buying pressure will come from the bridge to Anchor protocol, where **5% of the yield** on pre funded deposits of our customers will be all distributed for the purpose of burning of $STT tokens. This will lead to a massive price rise of our token, which benefits investors long term.

Governance - Governance - $STT would allow holders to propose and vote on on-chain governance proposals to determine future features and parameters of the StarTerra platform, with voting weight calculated in proportion to the tokens staked (the right to vote is restricted solely to voting on features of the StarTerra platform. For example, they may vote on the specific amount of tokens required for each gamified tier system.

Liquidity Staking - to provide easy access to $STT and promote ecosystem growth, users will be incentivised to play the role of liquidity providers and stake their digital assets into various decentralised market making pools to provide the necessary liquidity for transactions. These users would be rewarded with additional $STT for their contributions. By distributing $STT in this manner, it ensures that the governance token will be distributed primarily to key network contributors and allow them to have a say in protocol parameters.

Deflationary tokenomics - all fees generated by StarTerra will be split into three parts:

30% - $STT burning smart contract

20% - Play2Earn funding

Archived copy · cryp2nova.com

10% - Rewards for $STT liquidity providers

The rest of the transaction fees will be used for the purpose of maintenance of the StarTerra platform.

12. Token Distribution

There are planned to be a total of **100M $STT** tokens to be distributed over a period of at least **39 months**. Beyond that, there will be no more new $STT tokens introduced to the supply and the total supply will be constantly reduced through our buyback and burn mechanisms mentioned previously. Annualized APR per month decreases each month and it's average per month ratio is 9,7%. This model maximizes reward for early stakers as an incentive to secure early development of our platform and provides our long term token holders with a decreasing inflation model.

A total of **3.92M $STT** tokens are released at the genesis of StarTerra with the listing price of 0.14$ which leads to an **initial market cap** of **549.9K $!**

The initial distribution of $STT is given to:

- **Liquidity**: **1.17M** tokens will be reserved for providing initial liquidity for Terra and ERC20. This amount might be subject to change depending on the market conditions and potential CEX listing.
- **Private sale: 1.7M** tokens will be distributed to our private sale participants (10% TGE). Their remaining tokens will be vested lineary over a 6 months long period.
- **Marketing: 0.85M** tokens will be reserved for our marketing partners (10% TGE). Then the tokens will be cliffed for 1 month and afterwards vested daily over a 9 months long period.
- **Public sale: 0.2M** tokens will be distributed to our public sale investors (10% TGE). Their remaining tokens will be vested lineary over a 3 months long period.

It's worth mentioning this is only genesis supply distribution, which means the rest is vested. Our goal was to combine healthy tokenomics with a fair distribution amongst the community.

Archived copy · cryp2nova.com

Community members will be able to get $STT tokens in the many interesting ways including:

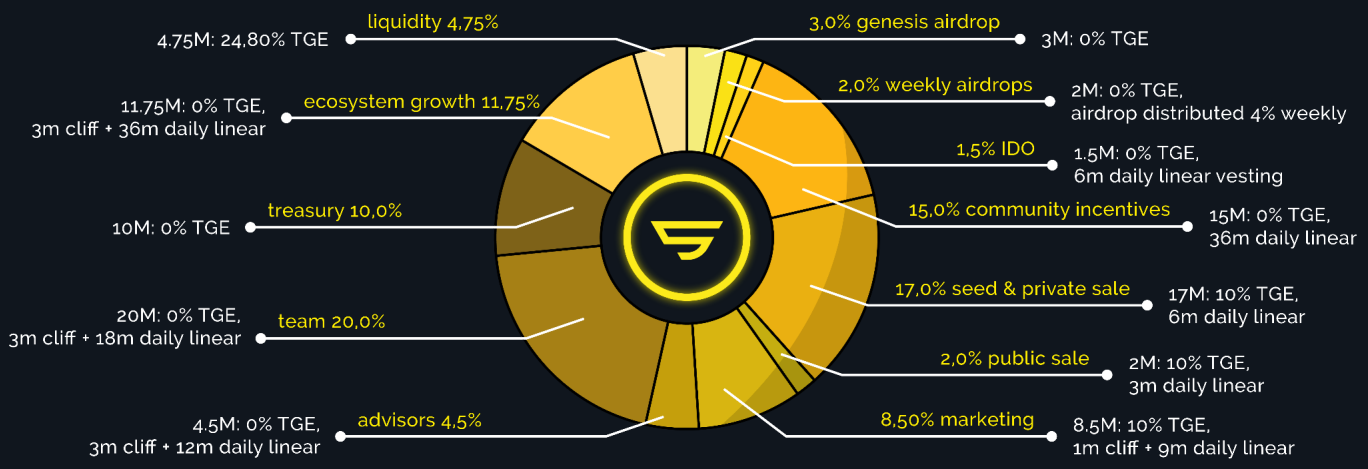

- **Airdrop for $LUNA stakers: 1M**
- **Airdrop for bLUNA providers: 1M**
- **Airdrop for whitelisted community: 1M**
- **Public presale: 2M**
- **post IDO on StarTerra: 1.5M**

It's worth mentioning $STT airdrop will be distributed in the fair manner with the target of avoiding distributing it mostly amongst the whales, like it was a case with the previous airdrops on Terra. This is why, we will introduce a hard cap of $LUNA staked/bLUNA provided over which you will not be able to get more of $STT airdrop. In this way we want to support less wealthy community members, who are the core of every successful ecosystem.

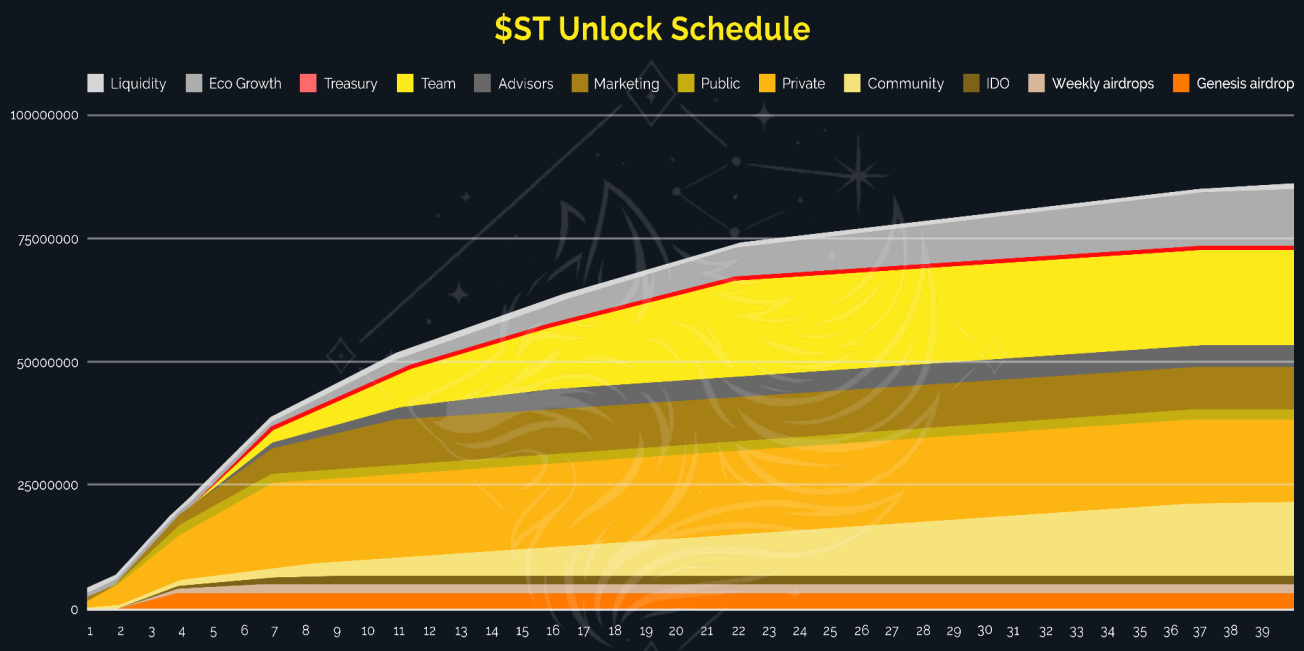

Our plan for public presale is to distribute it amongst 560 community members with a 500$ worth ticket. If it goes to the community airdrop it will be distributed amongst 10k community members with 100 STT tokens per whitelisted user. Our goal is to distribute it fairly amongst most engaged community members, not bots so we will gamify the way of getting whitelisted. You will need to follow some tasks which will grant you extra tickets in the lottery. This means the more proactive you are, the better chance of getting whitelisted. We will also introduce special anti-bot measures.

15. Team

Kamil **Jarzombek**

Strategic Partner & Investor

Kamil Jarzombek is one of the most reputable cryptocurrency experts and market specialists in Poland. He's been running his YouTube channel which is valued for professional fundamental analysis with a great focus on tokenomics. He's also an ICO investor & early adopter of $ETH

Wojciech **Gruszka**

CEO & Founder

Wojciech Gruszka (PanParagraf) is a lawyer and blockchain projects advisor. Thanks to his experience gained in international corporations such as Deloitte and Shell he's been successfully advising various fintech organisations. Known to a wider audience for his Twitter profile based on extensive tokenomics analysis.

Do **Kwon**

Trusted Partner

There is no need to introduce Do Kwon, the Founder & CEO of Terraform Labs and the whole Terra Blockchain. Thanks to his inspiring work, there are plenty of amazing projects building on Terra. StarTerra is one of the projects which has been built from the very beginning with his support.

Michał **Kurdziel**

CTO

Michal during his 13-year professional path went through all positions in the software development process. He's a well-experienced team leader with crucial in this position soft skills and technical background. I can personally add that he is kind of genius with fast learning skills.

Maciej **Mitkowski**

Head of UX/UI

Maciej Mitkowski is a world-class UX/UI expert. As the CEO of imTU company - specializing in design and development, he has acquired competencies that allow him to manage entire implementation processes. In StarTerra, he's responsible for all that is visible. Personally also a great cryptocurrency enthusiast.

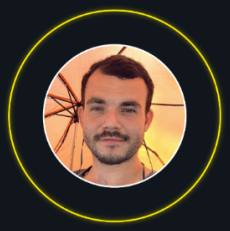

Tomasz **Kowalczyk**

Solutions Architect

Tomasz is the most reputable blockchain expert in Poland. He is well known from his YT channel CryptoDev where he educates people about technical aspects of Blockchain technology. With Tomasz onboard we have guarantee that our smart-contracts will be designed on the highest possible level

Further, you acknowledge that circumstances may change and that the Whitepaper or the Website may become outdated as a result; and neither the Company nor the Distributor is under any obligation to update or correct this document in connection therewith.

Token Documentation: Nothing in the Whitepaper or the Website constitutes any offer by the Company, the Distributor, or the StarTerra team to sell any $STT (as defined herein) nor shall it or any part of it nor the fact of its presentation form the basis of, or be relied upon in connection with, any contract or investment decision. Nothing contained in the Whitepaper or the Website is or may be relied upon as a promise, representation or undertaking as to the future performance of the StarTerra platform. The agreement between the Distributor (or any third party) and you, in relation to any distribution or transfer of $STT, is to be governed only by the separate terms and conditions of such agreement.

Whitepaper modifications: the company reserves the right to change the text and substance of this Whitepaper.

The information set out in the Whitepaper and the Website is for community discussion only and is not legally binding. No person is bound to enter into any contract or binding legal commitment in relation to the acquisition of $STT, and no digital asset or other form of payment is to be accepted on the basis of the Whitepaper or the Website. The agreement for distribution of $STT and/or continued holding of $STT shall be governed by a separate set of Terms and Conditions or Token Distribution Agreement (as the case may be) setting out the terms of such distribution and/or continued holding of $STT (the Terms and Conditions), which shall be separately provided to you or made available on the Website. The Terms and Conditions must

be read together with the Whitepaper. In the event of any inconsistencies between the Terms and Conditions and the Whitepaper or the Website, the Terms and Conditions shall prevail.

Archived copy · cryp2nova.com

$STT: $STT is a non-refundable functional utility token which will be used as the medium of exchange between participants on the StarTerra platform in a decentralised manner. The goal of introducing $STT is to provide a convenient and secure mode of payment and settlement between participants who interact within the ecosystem on the StarTerra platform, and it is not, and not intended to be, a medium of exchange accepted by the public (or a section of the public) as payment for goods or services or for the discharge of a debt; nor is it designed or intended to be used by any person as payment for any goods or services whatsoever that are not exclusively provided by the issuer. $STT does not in any way represent any shareholding, participation, right, title, or interest in the Company, the Distributor, their respective affiliates, or any other company, enterprise or undertaking, nor will $STT entitle token holders to any promise of fees, dividends, revenue, profits or investment returns, and are not intended to constitute securities in Singapore or any relevant jurisdiction. $STT may only be utilised on the StarTerra platform, and ownership of $STT carries no rights, express or implied, other than the right to use $STT as a means to enable usage of and interaction within the StarTerra platform.

$STT also provides the economic incentives which will be distributed to encourage users to contribute to and participate in the ecosystem on the StarTerra platform, thereby creating a mutually beneficial system where every participant is fairly compensated for its efforts. $STT is an integral and indispensable part of the StarTerra platform, because without $STT, there would be no incentive for users to expend resources to participate in activities or provide services for the benefit of the entire ecosystem on the StarTerra platform. Given that additional $STT will be awarded to a user based only on its actual usage, activity and contribution on the StarTerra platform and/or proportionate to the frequency and volume of transactions, users of the StarTerra platform and/or holders of $STT which did not actively participate will not receive any $STT incentives.

$STT are designed to be utilised, and that is the goal of the $STT distribution. In fact, the project to develop the StarTerra platform would fail if all $STT holders simply held onto their $STT and did nothing with it. In particular, it is highlighted that $STT:

(a) does not have any tangible or physical manifestation, and does not have any intrinsic value (nor does any person make any representation or give any commitment as to its value);

(b) is non-refundable and cannot be exchanged for cash (or its equivalent value in any other digital asset) or any payment obligation by the Company, the Distributor or any of their respective affiliates;

(c) does not represent or confer on the token holder any right of any form with respect to the Company, the Distributor (or any of their respective affiliates), or its revenues or assets, including without limitation any right to receive future dividends, revenue, shares, ownership right or stake, share or security, any voting, distribution, redemption, liquidation, proprietary (including all forms of intellectual property or licence rights), right to receive accounts, financial statements or other financial data, the right to requisition or participate in shareholder meetings, the right to nominate a director, or other financial or legal rights or equivalent rights, or intellectual property rights or any other form of participation in or relating to the StarTerra platform, the Company, the Distributor and/or their service providers;

(d) is not intended to represent any rights under a contract for differences or under any other contract the purpose or pretended purpose of which is to secure a profit or avoid a loss;

(e) is not intended to be a representation of money (including electronic money), security, commodity, bond, debt instrument, unit in a collective investment scheme or any other kind

of financial instrument or investment;

(f) is not a loan to the Company, the Distributor or any of their respective affiliates, is not intended to represent a debt owed by the Company, the Distributor or any of their respective affiliates, and there is no expectation of profit; and

(g) does not provide the token holder with any ownership or other interest in the Company, the Distributor or any of their respective affiliates.

Notwithstanding the $STT distribution, users have no economic or legal right over or beneficial interest in the assets of the Company, the Distributor, or any of their affiliates after the token distribution.

To the extent a secondary market or exchange for trading $STT does develop, it would be run and operated wholly independently of the Company, the Distributor, the distribution of $STT and the StarTerra platform. Neither the Company nor the Distributor will create such secondary markets nor will either entity act as an exchange for $STT.

Deemed Representations and Warranties: By accessing the Whitepaper or the Website (or any part thereof), you shall be deemed to represent and warrant to the Company, the Distributor, their respective affiliates, and the StarTerra team as follows:

(a) in any decision to acquire any $STT, you have shall not rely on any statement set out in the Whitepaper or the Website;

(b) you will and shall at your own expense ensure compliance with all laws, regulatory requirements and restrictions applicable to you (as the case may be);

(c) you acknowledge, understand and agree that $STT may have no value, there is no guarantee or representation of value or liquidity for $STT, and $STT is not an investment product nor is it intended for any speculative investment whatsoever;

(d) none of the Company, the Distributor, their respective affiliates, and/or the StarTerra team members shall be responsible for or liable for the value of $STT, the transferability and/or liquidity of $STT and/or the availability of any market for $STT through third parties or otherwise; and

(e) you acknowledge, understand and agree that you are not eligible to participate in the distribution of $STT if you are a citizen, national, resident (tax or otherwise), domiciliary and/or green card holder of a geographic area or country (i) where it is likely that the distribution of $STT would be construed as the sale of a security (howsoever named), financial service or investment product and/or (ii) where participation in token distributions is prohibited by applicable law, decree, regulation, treaty, or administrative act (including without limitation the United States of America and the People's Republic of China); and to this effect you agree to provide all such identity verification document when requested in order for the relevant checks to be carried out.

The Company, the Distributor and the StarTerra team do not and do not purport to make, and hereby disclaims, all representations, warranties or undertaking to any entity or person (including without limitation warranties as to the accuracy, completeness, timeliness, or reliability of the contents of the Whitepaper or the Website, or any other materials published by the Company or the Distributor). To the maximum extent permitted by law, the Company, the Distributor, their respective affiliates and service providers shall not be liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including, without limitation, any liability arising from default or negligence on the part of any of them, or any loss of revenue, income or profits, and loss of use or data) arising from the use of the Whitepaper or the Website, or any other materials published, or its contents (including without limitation any errors or omissions) or otherwise arising in connection with the same. Prospective acquirors of $STT should carefully consider and evaluate all risks and

uncertainties (including financial and legal risks and uncertainties) associated with the distribution of $STT, the Company, the Distributor and the StarTerra team.

Informational purposes only: The information set out herein is only conceptual, and describes the future development goals for the StarTerra platform to be developed. In particular, the project roadmap in the Whitepaper is being shared in order to outline some of the plans of the StarTerra team, and is provided solely for INFORMATIONAL PURPOSES

and does not constitute any binding commitment. Please do not rely on this information in deciding whether to participate in the token distribution because ultimately, the development, release, and timing of any products, features or functionality remains at the sole discretion of the Company, the Distributor or their

respective affiliates, and is subject to change. Further, the Whitepaper or the Website may be amended or replaced from time to time. There are no obligations to update the Whitepaper or the Website, or to provide recipients with access to any information beyond what is provided herein.

Regulatory approval: No regulatory authority has examined or approved, whether formally or informally, any of the information set out in the Whitepaper or the Website. No such action or assurance has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of the Whitepaper or the Website does not imply that the applicable laws, regulatory requirements or rules have been complied with.

Cautionary Note on forward-looking statements: All statements contained herein, statements made in press releases or in any place accessible by the public and oral statements that may be made by the Company, the Distributor and/or the StarTerra team, may constitute forward-looking statements (including statements regarding the intent, belief or current expectations with respect to market conditions, business strategy and plans, financial condition, specific provisions and risk management practices). You are cautioned not to place undue reliance on these forward-looking statements given that these statements involve known and unknown risks, uncertainties and other factors that may cause the actual future results to be materially different from that described by such forward-looking statements, and no independent third party has reviewed the reasonableness of any such statements or assumptions. These forward-looking statements are applicable only as of the date indicated in the Whitepaper, and the Company, the Distributor as well as the StarTerra team expressly disclaim any responsibility (whether express or implied) to release any revisions to these forward-looking statements to reflect events after such date.

References to companies and platforms: The use of any company and/or platform names or trademarks herein (save for those which relate to the Company, the Distributor or their respective affiliates) does not imply any affiliation with, or endorsement by, any third party. References in the Whitepaper or the Website to specific companies and platforms are for illustrative purposes only.

English language: The Whitepaper and the Website may be translated into a language other than English for reference purpose only and in the event of conflict or ambiguity between the English language version and translated versions of the Whitepaper or the Website, the English language versions shall prevail. You acknowledge that you have read and understood the English language version of the Whitepaper and the Website.

No Distribution: No part of the Whitepaper or the Website is to be copied, reproduced, distributed or disseminated in any way without the prior written consent of the Company or the Distributor. By attending any presentation on this Whitepaper or by accepting any hard or soft copy of the Whitepaper, you agree to be bound by the foregoing limitations.
