ON-CHAIN RAILS, CUSTODY & STANDARDS

Coinbase Base Arbitrum Chainlink

uRWA standard

Regulated securities are offered through licensed broker-dealer partners. Stobox is a technology provider, not a broker-dealer or investment adviser.

CRYP2NOVA

WHY IT'S DIFFERENT

From scattered files to a living asset.

THE OLD WAY	WITH STOBOX
✗ Records scattered across drives and inboxes	✓ **One canonical, sourced, verified record**
✗ Months of diligence back-and-forth	✓ **A data room that answers its own questions**

Archived copy · cryp2nova.com

✕ Raises structured slowly by outside counsel	✓ **A broker-accepted regulated offering**
✕ A static cap table in a spreadsheet	✓ **A live tokenized security with an On-Chain Passport**
✕ Investors left in the dark after closing	✓ **A public page that updates itself**

COMPLIANCE-FIRST

Regulated by design — never as an afterthought.

Every raise runs on a dual-track exemption framework, and Stobox never takes a percentage of what you raise.

Reg D 506(c) | Reg S | Dual-track exemptions | No commission on your raise

QUESTIONS

The short answers.

What exactly is the Readiness Score? –

Archived copy · cryp2nova.com

A free, two-part diagnostic — one score for how raise-ready your structure is, one for how tokenization-ready your asset is — measured across 7 pillars, with a clear next step for each gap.

Is my company data private? +

Do I have to tokenize to use Intelligence? +

What does it cost? +

Which assets and jurisdictions are supported? +

Find out exactly where you stand.

Three minutes, no cost, no commitment. Get your two-score readiness breakdown and a clear next step.
