Summary

Streamflow exponentially grows on-chain economies by providing infrastructure for creation, distribution, and incentive alignment of tokens.

Market

Market size: Tokens on Solana reaching ~$47B, while the overall token market across blockchains stands at approximately $2.5T as of April 2026.

Problem

Challenges in token creation, aligning incentives, ensuring long-term value, and maintaining security throughout the token's lifecycle.

Solution

Streamflow solves misaligned incentives with secure token infrastructure for creation, distribution, and ecosystem growth.

Architecture & Features

Protocol, infrastructure, and app layers with smart contracts, SDKs, APIs enable seamless token experience.

Adoption & Growth

Archived copy · cryp2nova.com

Since Nov '21, over 1M users and 4200+ tokens have adopted Streamflow, expanding the ecosystem to drive further growth.

Business Model

Revenue from fees, platform access, and custom offerings. STREAM token adds new revenue streams.

Decentralization & Growing the Ecosystem

Streamflow supports Solana projects via grants, incubation, and mentorship to drive adoption.

Security

Extensive audits and three years in production without incidents ensure Streamflow's safety and reliability.

STREAM token

STREAM token enables governance, staking, premium access, and discounts, driving protocol decentralization.
