🌕 Ecosystem overview

Copy

Tegro is a multifunctional ecosystem that includes such products as: TegroMoney payment system, TON Hold non-custodial crypto wallet, TegroFinance decentralized exchange and NFT marketplace.

Tegro is one of the few teams that includes most of the WEB 3.0 oriented services. All products within the ecosystem are interconnected, and users can receive bonuses and benefits.

Due to complicated structure of the ecosystem, scammers can take advantage of this and fraudulently try to get your assets on our behalf. The Tegro team will never write to you first or request any funds.
