Your Docusaurus site did not load properly.

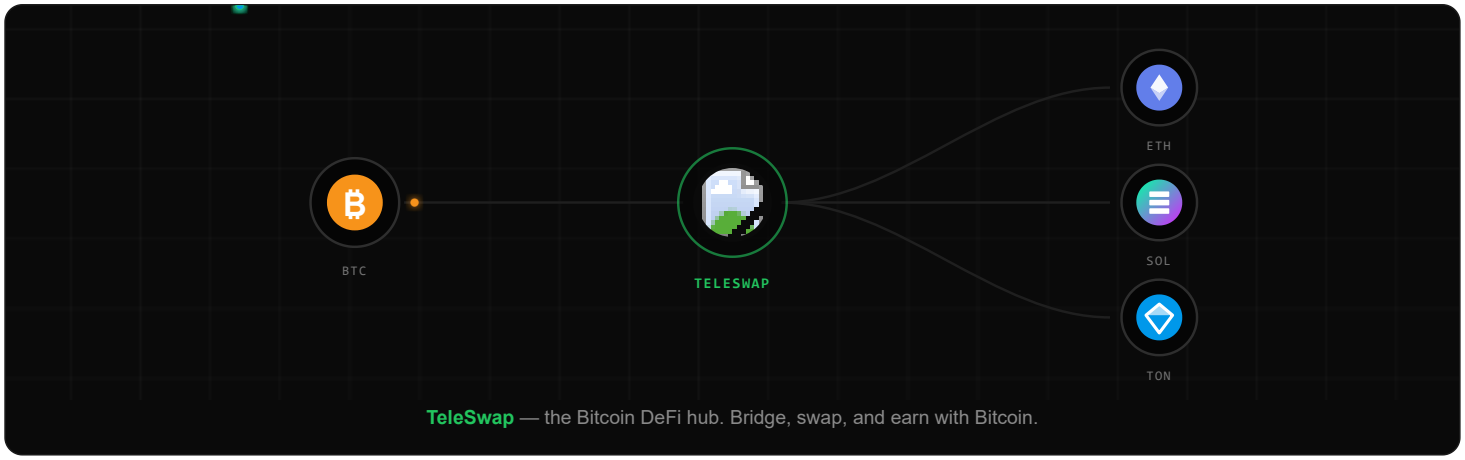

A very common reason is a wrong site **baseUrl configuration**.

Current configured baseUrl = **/docs/**

We suggest trying baseUrl = **/D:/Desktop/whitepapers/whitepapers_html/whitepapers/15419_TST_Teleport_System_Token.html/**

TeleSwap — the Bitcoin DeFi hub

TeleSwap lets you **bridge, swap, and earn** on Bitcoin. Move BTC to EVM chains, TON, and Solana, swap into their tokens (ERC-20s, Jettons, and SPL tokens), and put your Bitcoin to work — trustlessly.

Start here

- **What is TeleSwap?** — the hub in one page
- **User quickstart** — your first bridge & swap
- **Developer quickstart** — install the SDK
- **Protocol overview** — how it works under the hood

Build on TeleSwap

- **SDK** — TypeScript SDK (`@teleportdao/teleswap-sdk`)
- **API** — the TeleSwap REST API
