

# 👋Lumi X Tenna Whitepaper

Copy

In the innovative wave of Web3, LPC↗ dream of a world where human connections and warm trust are at the center, rather than the complexity and coldness of technology. The project 'Lumi↗ and Tenna↗' is a dual AI agent system that starts from that very dream, providing a special experience where users and the ecosystem 'tame' each other.

This project is not just a technical platform, but a new paradigm that combines the decentralized philosophy of Web3 with human emotional needs, designed to allow users to feel a true sense of belonging and value in the digital world. Today, the Web3 ecosystem is filled with innovations like blockchain, NFTs, and DeFi, but many people still hesitate to participate due to technical barriers and emotional distance. 'Lumi and Tena' was born to solve these problems, proposing a user-centered warm journey powered by AI.
