WHAT IS TETHEREUM?

Tethereum Token and decentralised exchange native to BNBChain. In other words, Tethereum Exchange shares some similarities with established platforms like UniSwap, Sushiswap or Pancakeswap in that users can swap their coins for other coins without the input of middleman services.

The only difference is that Tethereum focuses on BEP20 tokens a specific token standard developed by Binance. The BEP20 standard is essentially a checklist of functions which enable new tokens to perform in compatibility with the broader Binance ecosystem of dapps, wallets and other services.

HOW TETHEREUM WORKS?

For those unfamiliar with the workings of decentralised exchanges, they use a special system known as an automated market maker(AMM) so the entire process does not require order books or a single, intermediary company to facilitate trading.
In essence, there is no need for an order matching system since traders trade against liquidity pools instead of counter parties.
A liquidity pool in this context refers to funds deposited by investors

– which can be anyone from around the world
– in to smart contracts for the aim of providing liquidity to traders.

With this system, buyers do not have to wait to be matched with sellers or vice versa. Whenever someone wants to trade one token for another, they simply deposit the token they have in to the pool and withdraw the other token they wish to receive and perform a kind of an OTC SWAP

THE ECOSYSTEM TETHEREUM SWAP-DAPP

Built to run on Binance on permissionless blockchain. Provides increased capital efficiency and highest fee earnings to Liquidity providers with measured risks and tools. Decetralised application with a simple and clean UI. Open Source. 100% Community driven from marketing to development. Swap Tokens at Highest Liquidity Earnings and Least Gas Fees.

GOVERNING TOKEN - T99

Gives holders power to govern the Tethereum project, help with it's development and marketing. To be specific, 1,000,000,000 T99 in your wallet gives you a 20% governance power and voting rights.

TOKENOMICS

Total T99 Supply 10,00,00,00,000

The Founders will publish their wallets upon ICO commencement.
Progress Burn tokens will be burnt on a schedule as the project accomplishes its benchmarks.
All the burn decisions to be taken by the voting system on Community Discussions and Social Media.
10% Tokens in Owner's and Team's wallets are kept as a base 20% Voting Power for governing Tethereum.
So 1,000,000,000 T99 in your wallet gives you a 20% Voting Power as well.
All the other distributed pieces are self-explanatory.
