Welcome to Tevaera

Redefining Gaming with onchain Guilds and Games.

Welcome to the official documentation for Tevaera — an onchain gaming platform powered by Teva Protocol, where tokenized guilds and native games power a self-sovereign economy.

Whether you're a gamer, guild leader, builder, or simply curious about the future of onchain gaming — you're in the right place.

What is Tevaera?

Tevaera is a full-stack gaming platform designed for players, creators, and developers — bringing together Guilds, Games, Governance, and Markets in one seamless ecosystem.

At its core lies Teva Protocol: a permissionless infrastructure layer enabling the creation, coordination, and growth of tokenized guilds, native game economies, and community-owned systems.

Think of it like this:

> Teva Protocol is the engine — powering rules, incentives, and onchain logic.
>
> Tevaera is the experience — where it all comes to life through guilds and games.

What You’ll Find in Tevaera

Guilds | Games | Market | Governance

Fully tokenized onchain communities with ERC-20 utility tokens, treasuries, and governance

All composable. All permissionless. All onchain.

What Can You Do Here?

- Launch an Onchain Guild in just a few clicks
- Generate your own AI-powered 3D Mascot — your Guild’s playable identity and IP
- Play fun, native games like Teva Run — with more titles on the way
- Earn rewards through gameplay, guild growth, and contributions
- Stake LP tokens and participate in Guild governance
- Build or integrate games directly on Teva Protocol
- Explore the Guild & Game economy flywheel powering it all

CRYP2NOVA

Who Is This For?

- [x] Guild Creators & Communities — Launch and lead your own economic layer
- [x] Players & Fans — Join guilds, earn rewards, and play native titles
- [x] Game Developers — Build or integrate games with native guild support
- [x] Everyone — Create modular, community-owned gaming systems
