THE INVINCIBLE GG BLUEPRINT

Copy

Skill Gaming Reimagined

Invincible GG is a competitive gaming platform company focused on AI-powered virtual sports. Our mission is to unleash a new era of interactive sports entertainment and competitive gaming through mobile games, skill contests, and content distribution for wagering.

We utilize cutting-edge patented technologies (AI, advanced sports simulation) and blockchain to deliver immersive and rewarding skill gaming experiences where players compete with their gaming IQ rather than their thumbs and experience “True Ownership” of their digital, AI-powered assets.

We are focused, through innovative partnerships with industry leaders and gaming communities, to make our games and platform benefits accessible to billions of mobile and skilled gaming fans. We have built our ecosystem as a platform for independent developers and publishers to distribute games for legal skill gaming and regulated wagering while leveraging blockchain technologies.

We aspire to become the next Valve (Steam) and Epic (EGS), which have delivered platforms supporting unprecedented growth in the gaming industry by facilitating the creation and distribution of independent games. Our shift from pay-to-play to play-to-own-and-earn sets us apart, creating a more engaging and rewarding experience that attracts a broader audience and empowers players to truly own their in-game assets and achievements.
