About Tradoor

Tradoor is the fastest and friendliest way to trade Options and Perps on web, mobile, and Telegram. Get started with less money upfront, and enjoy private, one-tap trades, with no hidden costs.

Why trade on Tradoor?

- **Turbo-speed trades:** Orders are confirmed in just 50ms.
- **No hidden costs:** The price you see is locked the moment you order.
- **Multi-chain access:** Coming to a chain near you, starting on TON.
- **Unrivaled security:** Our AI-enhanced liquidity shield protects you from toxic flow.
- **Your onchain privacy is protected:** Nobody can spy on your orders or front-run you.
- **Trade on autopilot:** Quant AI (coming soon) is a premium trading assistant designed to help you win more trades. Talk to it by text or voice to set your strategy, and it will trade for you 24/7 - even while you sleep.

How Tradoor works

Tradoor is designed to be the simplest way to trade crypto with leverage, with easy on-boarding for millions of users.

By applying machine learning and rigorous safety measures throughout the trading engine, users can trade with confidence - protecting traders, LPs, and the protocol from unexpected market changes.

Archived copy · cryp2nova.com

Risk control of liquidation for both traders and LPs, alongside a battle-tested Auto Deleveraging (ADL) system, acting as a fail-safe for extreme market conditions. This ensures the protocol remains free from counterparty risk and maintains insolvency resistance.

Tradoor is available on web, mobile, and Telegram, providing complete trading functionality on any device.
