Welcome

Welcome to the online portal of the OrdinalsBot Trio Token Whitepaper. Here you will find all the information you need to know about the token and it's utility.

"We can figure out the best way to do this much later." - Satoshi Nakamoto

Speaking on how to buy a JPEG image for $1 worth of Bitcoin - Bitcoin Forum, January 29th, 2010 ↗

CRYP2NOVA

Thirteen years after Satoshi himself helped facilitate the first sale of a JPEG image for Bitcoin, OrdinalsBot launched in February 2023. Just one month after the launch of Ordinals on Bitcoin, OrdinalsBot pioneered inscription as a service and finally fulfilled Satoshi's vision of the best way to collect and trade art on Bitcoin. But OrdinalsBot did not stop there.

While OrdinalsBot began by empowering collectors, artists, communities, founders, builders, and innovators to easily mint Ordinals, 'inscriptions as a service' is just a small part of the complete set of solutions provided today, and those available in the future.

Archived copy · cryp2nova.com

Since its creation, OrdinalsBot has served more than 110k wallets and powered some of the largest and most renowned mints in Bitcoin’s history, including Runestones, Bitcoin Punks, and ORDI, the first BRC20 token to reach a $1bn market cap.

Today that track record of innovation continues with the launch of the world’s first utility-driven BRC20 token TRIO - deriving its name from the trio of product-lines OrdinalsBot offers:

1. Inscription minting, launchpad, and consumer services
2. API for enterprises
3. Marketplace for inscription and Ordinals trading

With the impending launch of Runes, we will also be providing our token holders with access to our Runes drop, so we will be innovators in both BRC 20 and Runes.

Highlights

- **TRIO** is the world's first utility-driven BRC-20 token, designed to align incentives and drive ecosystem growth within the OrdinalsBot platform.
- Backed by top-tier investors such as **DACM**, **Eden Block**, **Kestrel0x1**, and **UTXO Management**, OrdinalsBot has raised over $4.5M in funding.
- OrdinalsBot has a proven track record of innovation, having inscribed some of the largest known images on a Bitcoin block, inscribed work for high-profile launches like **French Montana's Mac & Cheese 5** and **Wu-Tang Clan** rapper **Ghostface Killah**’s recent ordinals drop, and served as the inscription platform for ORDI, the first billion-dollar market cap BRC-20 token.
- Strong partnerships with leading industry players, such as BRC-20 creator Domo and **Marathon Digital Holdings**, position OrdinalsBot at the forefront of Bitcoin's evolving ecosystem.
- Comprehensive product suite includes seamless Ordinals and BRC-20 creation tools, powerful APIs, the Scribe protocol for uncensorable on-chain publishing, and an upcoming marketplace for seamless trading of tokens.

Our Vision

OrdinalsBot is building essential infrastructure for the Bitcoin ecosystem, unleashed by Ordinals and fungible inscription standards such as BRC-20 and Runes. By providing the tools and infrastructure required to inscribe data, media, and complex digital assets directly onto individual satoshis, OrdinalsBot is transforming Bitcoin into a thriving ecosystem of decentralized applications and immutable on-chain records.

The official utility token of OrdinalsBot, TRIO, is designed to supercharge the platform's tools and services. Holders can use TRIO for a discount on fees, earn staking-like rewards, get rewarded for platform engagement and contributions, and participate in governance. The TRIO token aligns incentives between the platform and community, driving demand and encouraging long-term holding.

We envision a future where Bitcoin's full potential is realized through the seamless integration of data, media, and complex digital assets. By providing the critical infrastructure and tools needed to inscribe, manage, and trade these assets, we aim to accelerate Bitcoin's transformation into a robust, decentralized ecosystem that empowers creators, collectors, and innovators alike.

Our mission is to lower the barriers to entry for individuals and businesses looking to leverage Bitcoin's unique properties, such as immutability, security, and decentralization. Through our suite of user-friendly tools, powerful APIs, and strategic partnerships, we are committed to driving the widespread adoption of Bitcoin-based digital assets and fostering a vibrant community of developers, artists, and entrepreneurs.
