Introduction

Copy

> *"The best way to predict the future is to build it."*

Vertical is an AI-first company operating at the intersection of web2 and web3. We build products that solve real problems, offer services that bring new innovation into our ecosystem, and tie everything together through a single token economy designed to compound growth.

This documentation provides a complete overview of the Vertical ecosystem: our vision and mission, the products and services we offer, the role of the VERTAI token, and how our loyalty and utility layers reward participation across everything we build.

Whether you're a user, builder, investor, or curious observer, this is your guide to understanding what Vertical is, where we're headed, and how to get involved.

What you'll find here:

- Our **vision, mission, and strategic evolution** from products to ecosystem
- An overview of **Vertical Products** including Stream, Motion, and Studio
- An introduction to **Vertical Services** including Labs and the Vertical Alliance
- The **VERTAI token economy**, including utilities, loyalty mechanics, and the Vertical Gateway
