WAV.3 Overview

WAV.3 is like **Grass.io for music discovery and streaming**.

By linking your DSP (like Spotify), you earn rewards for the music you already listen to — **without changing how you listen to it**.

Your participation powers a new merit-based discovery engine: your streams feed into your **TasteGraph**, which personalizes recommendations, verifies authentic activity, and helps surface great music from emerging artists.

Instead of getting lost in algorithms, your taste becomes part of the network — and you earn for it.
