It enables seamless trading with other ERC-20 tokens on decentralized platforms. Instead of wrapping ETH, users trade it via a smart contract for an equivalent amount of wETH, which can later be converted back to ETH. wETH ensures compatibility within the Ethereum ecosystem, allowing for direct transactions on decentralized exchanges that require uniform token standards. This downturn affected major cryptocurrencies, including Ethereum (ETH), which fell by 5.36%, and Wrapped Ether (WETH), which saw a 5.70% decline 1 . This broad market decline coincided with a general tumble in stock prices, indicating a wider risk-off sentiment across financial markets 1 . The synchronized drop across various assets, including Wrapped Staked ETH (WSTETH) and Wrapped Bitcoin (WBTC), suggests that institutions are broadly pulling back from risk, potentially signaling broader market

turmoil 1 2 . This event highlights the interconnectedness of the crypto market with traditional finance and the impact of macroeconomic factors on asset prices. Get Caught Up BitMine Immersion's ETH Accumulation and Staking BitMine Immersion Technologies significantly increased its Ethereum holdings by 41,788 ETH over the past week, bringing its total treasury to 4.285 million ETH 3 . This move reflects a long-term strategy to accumulate ETH, with the firm's holdings representing approximately 3.55% of the circulating supply 3 4 . BitMine's executive chairman, Thomas Lee, views unrealized losses during market downturns as part of their core strategy, which focuses on ETH accumulation and staking yield 4 . The company is also preparing to launch its Made in America Validator Network (MAVAN) in early 2026, projecting an annualized staking yield of approximately $188 million 3 . KuCoin Delists WETH Margin Trading Pairs On February 2, 2026, KuCoin announced the delisting of specific margin trading pairs, including Wrapped Ether (WETH), ETHS, and ETCZ 5 . This action by a major centralized exchange (CEX) can impact liquidity and trading options for WETH, potentially shifting trading volume to other platforms or decentralized exchanges (DEXs) 5 . Such delistings often reflect changes in exchange policies, market demand, or regulatory considerations for specific assets. Ethereum Supply Tightens with Increased Locking Approximately 45% of all Ether (ETH) is now locked or difficult to sell, according to a Sygnum report on January 30, 2026 6 . This reduction in liquid supply is attributed to increased staking, accumulation by Exchange-Traded Funds (ETFs), and corporate holdings 6 . ETH held on exchanges decreased by 14.5% during Q1 2026, continuing a multi-year downward trend 6 . This tightening supply, driven by factors like large deposits from firms such as BitMine, suggests growing confidence in Ethereum's long-term value and its role in the ecosystem 6 . Biggest Stories of 2025 mETH Protocol 2025 Recap The mETH Protocol had a significant year, with institutional capital flowing into Ethereum, driven by over $13 billion in ETF inflows. The protocol expanded across Mantle Network, Ethereum, and HyperEVM, achieving a peak Total Value Locked (TVL) of over $2.19 billion and onboarding 76,712 unique addresses. (December 30, 2025) 7 8 Bitmine's Ether Stash Tops 4.1 Million Tokens Bitmine Immersion's total crypto, cash, and investment holdings reached $13.2 billion, with its Ether (ETH) stash topping 4.1 million tokens, representing approximately 3.4% of the total supply. (December 29, 2025) 9 ETHZilla Sells $74.5 Million of Ether ETHZilla sold $74.5 million worth of Ether (ETH) to reduce its debt load. (December 22, 2025) 10 Guavy Launches AI-Powered Crypto Market Sentiment App Guavy launched its AI-powered mobile application on the Apple App Store, providing institutional-grade crypto market sentiment signals to retail investors. (December 22, 2025) 11 Boxing Day Bonanza: $27 Billion in Bitcoin, Ether Options Set for Year-End Reset A combined $27 billion in Bitcoin and Ether options were set to expire on the Deribit exchange, representing over 50% of its total open interest. (December 22, 2025) 12 Analysis of stETH in Light of SEC Guidance An analysis concluded that Lido protocol's liquid staking token, stETH, and its wrapped version, wstETH, do not constitute the offer or sale of securities under U.S. federal law, following SEC guidance. (December 19, 2025) 13 U.S. Bitcoin, Ether ETFs See Largest Outflows Since November 20 U.S. spot Bitcoin and Ether ETFs experienced a combined $582 million in net outflows, the largest since November 20, 2025, as Bitcoin declined. (December 16, 2025) 14 Ether Surges 8%, Outpacing Bitcoin Gains Amid Staking ETF, Tokenization Optimism Ether (ETH) rallied 8.4%, outpacing Bitcoin's gains, driven by optimism around BlackRock's filing for a staking ether ETF and regulatory efforts supporting real-world asset

What is the history of Wrapped Ether? Can I stake Wrapped Ether to earn rewards? Has Wrapped Ether experienced any hacks, exploits or outages? Is Wrapped Ether safe? How is it secured? Has Wrapped Ether been audited? Wrapped Ether Profile Wrapped Ether was first developed and implemented by a group of Ethereum projects led by 0x labs. This coalition of projects established a canonical ERC20-compliant wrapped ether token in order to create standardization and maximize security across applications. WETH was created to allow users to convert ETH to WETH without using a centralized party and then be able to use those WETH tokens on dApps in the Ethereum ecosystem. The first proposed canonical WETH contract was released in November of 2017. The current deployed WETH contract can be found here.
