📖WORLD3 Whitepaper

Copy

Authors: WORLD3 Core Team
Date: July 2025

WORLD3 is a decentralized platform that empowers users to create and deploy AI agents capable of performing task automation and strategic operations across both Web2 and Web3 ecosystems. Powered by cutting-edge Agent VM technology and the WORLD3 AI Protocol, our platform enables users to build expert-level agents equipped with hierarchical planning, continuous execution, multi-chain connectivity, and cross-platform automation.

We are building the world's **first Web3-native, expert AI agent workforce**, designed from the ground up to host a new class of digital entity: persistent, professional-grade agents capable of executing complex, multi-step tasks autonomously over extended periods.
