Chain Parameters
Run a Node

Permissioned & Compliant

Block bad actors at the protocol level. Every address can be removed from the network instantly — built for US regulatory compliance from day one.

3-Second Instant Finality

IBFT 2.0 delivers deterministic finality. No forks, no uncle blocks, no waiting. One block equals final — forever.

Full EVM Compatibility

Deploy any Solidity contract. MetaMask, Hardhat, Foundry, ethers.js, viem — all Ethereum tooling works with zero changes.

Validator Staking Economy

28+ registered validators, delegated staking, commission splits, and direct on-chain reward payouts every 3 seconds.

Multi-Chain Bridge

Move BESC and assets between Ethereum, BNB Chain, XRP Ledger, and Solana via the native bridge.

Dual Explorer Coverage

USA (New York) and global Blockscout explorers with AI-powered transaction classification and real-time data.
